

# Your Hands are Full, Let Us Handle Medication Management.

## Medication History, Medication Adherence and E-Prescribing for Practices

### Empower Your Practice with Rcopia®

Rcopia is the leading stand-alone medication management solution for those who want all the advantages of integrated medication history, medication adherence and e-prescribing software but don't want to commit to an EMR/EHR system.

The first-ever standalone e-prescribing solution endorsed by the AMA, Rcopia gives providers a better clinical view of the patient and can save a practice \$15,000 annually by eliminating administrative tasks otherwise required of staff.

Rcopia is ranked #1 by Black Book Rankings and can help you and your staff improve efficiency, enhance patient safety and retain existing workflows supported by your PMS or other practice systems.

### Be Confident When it Counts

- Access 24 months of patient medication history, current formulary information, and drug-drug/drug-allergy interaction alerts
- Identify and guide patients at-risk for medication non-adherence with cutting-edge tools and resources in our Patient Advisor<sup>SM</sup> toolbar
- Securely write and send electronic prescriptions for legend drugs to any pharmacy from any desktop, laptop or mobile device
- Electronically prescribe controlled substances (schedule II-V) in one workflow with our EPCS Gold<sup>SM</sup> 2.0 add-on
- Eliminate pharmacy phone calls regarding prescription clarifications and refills
- Seamlessly order labs and radiology within the e-prescribing workflow

Your hands have more important things to do. Let us help you work smarter and safer with Rcopia.

## Medication Adherence is No Game of Chance.

### DrFirst's Patient Advisor

DrFirst's Patient Advisor gives physicians a suite of advanced clinical, behavioral and financial support tools designed to inform and improve medication adherence and disease self-management by high-risk patients.

Patient Advisor enables providers with patient medication adherence rates, a prior authorization module to streamline submission to payers, and evidence-based patient support tools to help solve underlying causes of non-adherence.

### Identify High Risk Patients at the Point of Care

Physicians can access the Patient Advisor Scorecard showing how closely patients adhere to their medications. An adherence score for all current medications helps to identify patients with low adherence rates, and address the reasons for non-adherence.

### Physician Tools Tailored to Patient Conditions

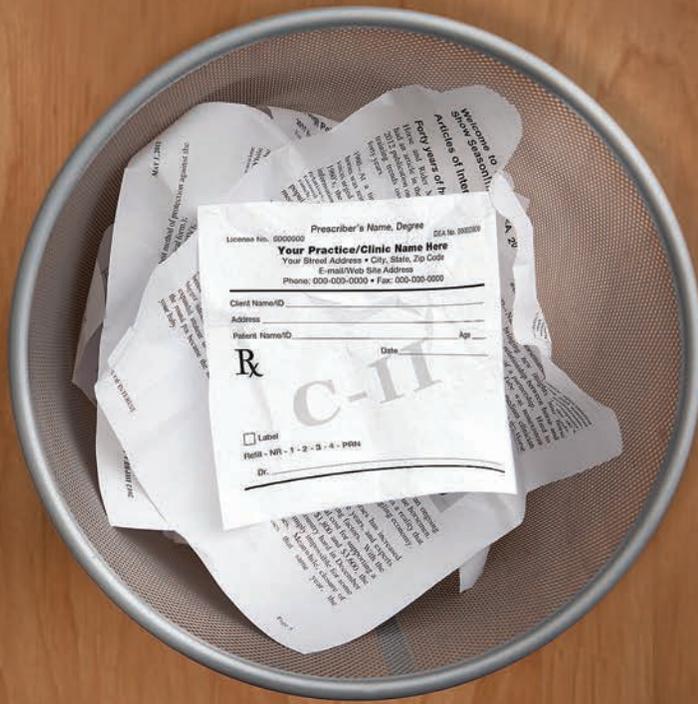

Some of the medication adherence tools available within Patient Advisor include:

- Visual data instantly alerting you when patients who have not filled or adhered to medications
- Education materials to help your patients understand their conditions and medications
- Financial savings programs, including coupons and co-pay savings, to help offset your patients' out of pocket costs

### In-Workflow Electronic Prior Authorization

Complete patient prior authorization quickly and easily to help prevent prescription abandonment.

- Reduces administrative hassles and turnaround time by returning up to 70% of prior authorizations within seconds
- Notifies provider immediately if selected drug, procedure, or medical equipment needs prior authorization
- Covers multiple health plans, PBMs, and vendors

# Finally, Say Goodbye to Your Prescription Pad.

## Electronically Prescribe Controlled and Legend Drugs in One Workflow

### Electronic Prescribing of Controlled Substances

EPCS Gold<sup>SM</sup> 2.0 by finally makes it possible to write all prescriptions electronically within one workflow. With EPCS Gold, you can electronically prescribe schedule II-V\* controlled substances, improving patient safety and helping to prevent fraud and abuse.

Controlled Substance e-Prescribing is already legal in the vast majority of U.S. states. EPCS-ready pharmacies are coming online daily, and new state mandates surrounding EPCS are near-term realities.

EPCS Gold can be easily implemented within the Rcopia interface and help you simplify your office workflow, prevent fraud and abuse and improve patient safety.

### Simplify Your Prescribing Workflow

EPCS Gold makes prescribing faster and more efficient by authorizing you to send controlled and non-controlled prescriptions in one simple workflow, providing an added convenience for your patients and allowing more time to be spent on patient care.

### Make Patient Safety a Priority

- Help prevent drug shopping
- Eliminate potential transcription errors
- Check controlled drugs for clinical alerts

The first-ever, end-to-end solution for controlled substance e-prescribing, fully-compliant with:

- DEA Interim Final Rule
- NIST Identity Proofing Requirements
- Surescripts Gold Certification

\*State restrictions may apply. Visit <http://epcs.drfirst.com> to learn more about electronic prescribing of controlled substances in your state.
