Lytec 2019 New Modules powered by CHS.

Stop wasting time and start reducing staff's stress by addressing your front office workflow.

Lytec's only fully integrated plug-in solution, UnifiMD streamlines patient messaging, efax, document management and patient registration.

Lytec Patient Engagement

Unlimited phone, text, and email module for patient appointments, reminders, surveys, medication

adherence, general health, practice marketing and bill payments. Link directly to your website for patient forms and appointment requests.

Lytec e-Fax Solution

Easily send and receive faxes via HIPAA compliant e-faxing powered by **Updox**. Faxes are easily management, organized, reviewed, retrieved, and stored using your Lytec data for integration and dashboard reviews.

Lytec Document Management and Scanning

User defined categories personalizes your screen's look and feel. The ability to open a patient and drop or scan a document in to their folder and search, view, edit, retrieve and annotate or assign by name, category or date reduces effort and improves efficiencies. **Never lose a referral, lab result, letter, x-ray or note ever again.**

Contact us for a personal review of your front office workflow.
