

# LYTEC 2022 FEATURES

CGM LYTEC® is a proven, trusted, and affordable practice management solution designed to simplify the way you run your practice. With each new release it gets better and more powerful as new layers of functionality and usability are added. Here are just a few of the notable benefits of upgrading to LYTEC 2022.

## Reporting for Payments Matching Date of Service

You've asked and we answered. CGM LYTEC 2022 now has a new report that matches payments with the Date of Service (DOS). Get a more complete view of your practice financials by viewing all payments, regardless of when they were received, for charges on a particular date or date range.

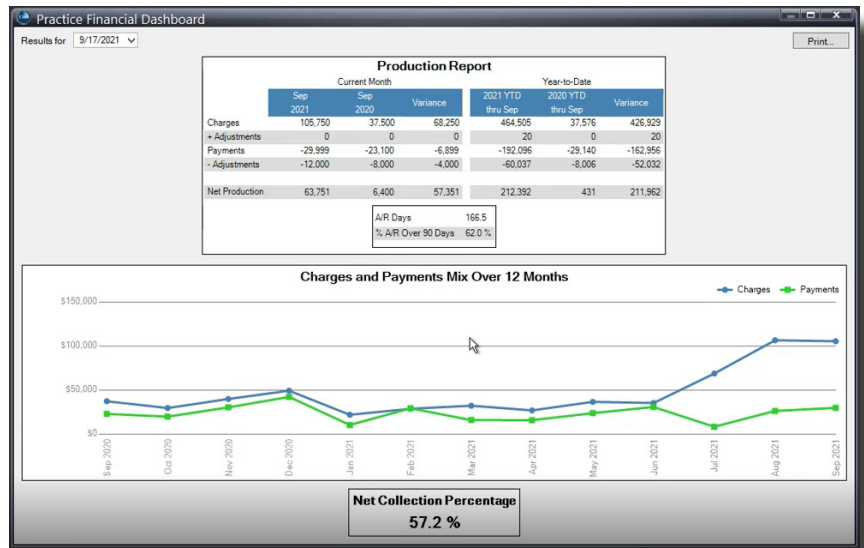

## Stay Compliant with 21st Century Cures Act Reporting & Demographic Requirements

It might not be the most exciting enhancement, but it is an important one. CGM LYTEC 2022 has been updated to include the latest 21st Century Cures Act requirements. The Cures Act includes provisions to promote health information interoperability, patient access to their records, and to prohibit information blocking. Physicians are required to respond to any legitimate request to exchange or provide access to electronic health information (EHI) stored in their health records. Requests can come from a patient, another provider, a health plan seeking information for clinical purposes, or a public health agency. With this new enhancement in LYTEC 2022, practices can print an individual patient record with all the mandatory demographic requirements protecting your practice from information blocking infractions.

## Monitor Practice Performance with A New Financial KPI Dashboard

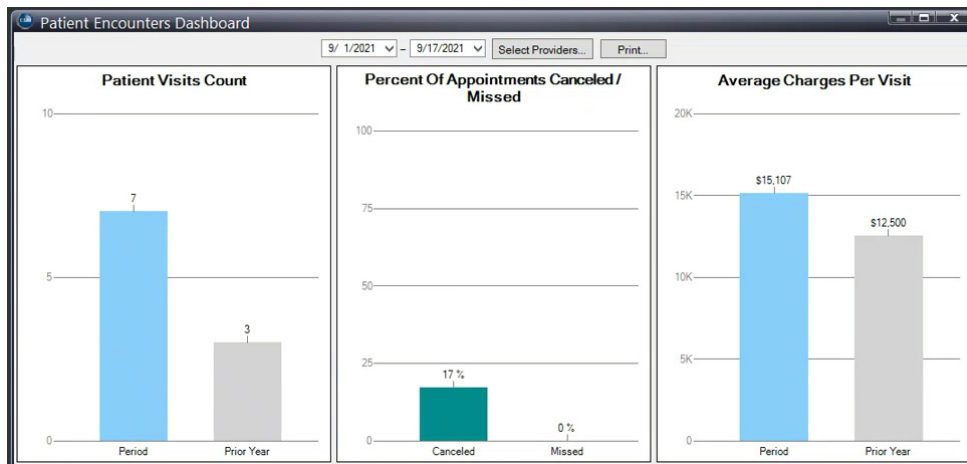

The Practice Financial Dashboard in CGM LYTEC 2022 is an executive summary of your key financial performance metrics. This report details your charges, adjustments, and payments for the selected month and year and compares it to the prior month and year.

By closely monitoring this dashboard, you can keep your finger on the pulse of your practice, quickly diagnosis problems, and create a care plan to keep your practice's financial health on track.

## Analyze Visit Data with New Patient Encounters KPI Dashboard

The new Patient Encounters Dashboard in CGM LYTEC 2022 provides year-over-year comparisons for critical patient data. Use this dashboard to determine if your patient visit count is growing or shrinking. Identify your patient no show rate and compare it to the previous year. See the impact on your revenue cycle with a year-over-year comparison of average charges per visit. This valuable data helps you understand patient dynamics and how it is impacting the overall financial health of your practice.

## New Workflow to Prevent Printing and Export of Inactive Items and Patients

A productivity improvement that will save you time and resources. The prevent printing and export features allows you to remove any inactive items or patients from lists prior to printing or exporting them, providing a cleaner view that is faster and easier to use.

## Enhance Practice Security with New Password Requirements

Passwords provide the first line of defense against unauthorized access to your practice's computers and patient's personal health information. The stronger your passwords, the more protected your system will be from hackers and malicious software.

In CGM LYTEC 2022, we have amped up your password security with a mix of alphanumeric characters plus upper- and lower-case letters.

## Integrate Your Schedule with A Robust Patient Reminder Tool - CGM CONNECTION\*

CGM CONNECTION is a state-of-the-art patient engagement platform that seamlessly integrates with CGM LYTEC 2022. CGM Connection allows your practice to send automated appointment reminders via SMS, email, and voice calls.

Pre-built templates make it easy for your practice to get up and running quickly. Simply choose a template, customize it to your specific needs, and you are ready to launch your patient reminders.

Each message can be customized and configured using a variety of parameters including appointment date, location, provider, visit type, and much more.

Real-time results allow you to track confirmations and cancellations, giving you more control of your practice's schedule.

Increase patient engagement, eliminate no-shows, and shore up your revenue cycle with CGM CONNECTION.
