UnifiMD VAR Partner Monthly News

HEAR YE, HEAR YE... 6 MONTHS FOR FREE!

Document Management Module

I am sure by now you have caught a glimpse of one (or two) of my emails about our 6 month free trial of our document management module. If you haven't, then take my emails out of the auto file email option please because you are going to continue to miss out on all our goodies! Here is the skinny on that:

- Yes, it is completely free with no obligations
- Yes, that includes: the license, the install, the implementation, the training and the support
- Yes, Mike has gone crazy
- After the fact, if they decide to keep it, all they are responsible to pay for is $49 retail per month per provider
- Offer expires June 30th
- Run to tell ALL your customers!!

Welcome!

Welcome to the sixth edition of our UnifiMD monthly newsletter, powered by CHS! Inside we will discuss...

- Hear ye, hear ye
- Requirements for hosting UnifiMD
- UnifiMD is expanding!
- Staff pet pic!

Requirements for providing UnifiMD in a multi-tenant environment

UnifiMD may be installed in a multi-tenant environment where multiple entities can share resources like SQL, Terminal Servers, and Web Servers, while remaining independent separate installations. UnifiMD Databases and Services may be installed on a physical or virtual server. Here are the <u>Baseline Requirements</u> for a 1 Dr, 5-user practice:

- Microsoft Windows Server 2016 or newer
- SQL Server 2016 Standard or newer (not express)
- 8 GB of RAM per 5-user client database
- Local Storage on SSD disks in a RAID10 configuration for SQL databases
- Processing power equivalent to 3.5 GHz Core CPU

Provision a dedicated server available for the UnifiMD SQL Server. This server will also run the UnifiMD Interface Services. Do not allow end-users to log on to the database server.

CHS recommends TSPrint, TSScan TSWebcam to provider remote printing, scanning and webcam functionality. Remote Desktop access must be via a private VPN tunnel. <u>Requirements per Client Entity</u>, 1 Dr 5-user practice:

- 8 GB of RAM on a common SQL server
- 8 GB of RAM on the Remote Desktop server
- 10 GB of Disk space per year of use (plus scan)
- Processor allocation varies
- Practice List and Registration

The Virtual Host Server must have at least 24 GB memory.

I will be sending you a document with more details. Let me know if you have additional questions.

UnifiMD is expanding!

Our UnifiMD Partner Channel is growing like weeds lately!! Since last month, we have had these new additions to the family:

- **Acquisition - This month we will be announcing our acquisition of Medisoft VAR, Computerized Business Systems, (Harry and Rachael Selent) from FL!**

- **New UnifiMD Partner who sells TotalMD in TN**

- **New UnifiMD Partner who sells Medisoft in FL**

- **New UnifiMD Partner who sells Lytec in NY**

- **New UnifiMD Partner who owns a billing service in MA.**

- **New Silver VAR in GA who sells TotalMD and Medisoft and is also a UnifiMD Partner**

Just For Fun

Pet of the month...

This is 8 year old English Bulldog, Doc. Doc was born in Corbin, KY and moved in with his family at 8 weeks old. His litter was named after the 7 dwarves. He was the smallest and the shyest, which is what made mom pick him. Doc's hobbies are napping, eating nom noms and being his Mommy's best friend!!
