Configurable threat
environments for any
mission or industry
application

INSTRUCTOR-LED AAR

Automated data capture
supports structured After
Action Reviews

DEPLOYABLE ANYWHERE

Compact, modular system
designed for rapid setup in any
facility

WHAT IS THE PDG EST SYSTEM?

The Paladin Defense Group Engagement Skills Trainer (EST) System is a state-of-the-art, simulation-based training platform designed to develop and sustain critical marksmanship, threat identification, and decision-making skills — without the cost, range requirements, or logistical burden of traditional live-fire programs. Built on decades of operational military and law enforcement training experience, the PDG EST System delivers measurable, repeatable, and scalable training outcomes across virtually every industry where personnel must be prepared to respond to threats.

The EST System replicates the sights, sounds, and decision pressures of real-world engagements using high-fidelity projection technology, force-on-force capable training weapons, and a comprehensive scenario library spanning active shooter events, armed robbery responses, vehicle interdiction, dignitary protection drills, and more. PDG's certified instructors design and facilitate every training evolution — ensuring that technical proficiency is paired with the tactical judgment to apply it effectively.
