URSUS HOME™ is the perfect stroller designed for daily rehabilitation of children with locomotor dysfunction.

Stable construction and an extensive system of supports and belts makes children feel very confidently and safely in **URSUS HOME™**.

Consequently, the small patient is able to take a meal, play, learn and perform the therapy exercises in seating or half-lying position. Caregivers can easily change the seat height. Angle adjustment of the backrest, seat, and footrest allows your child to rest in supine position.

A particular advantage that will be appreciated by therapist is infinitely adjustable tilt-in-space function.

Rich equipment and wide range of adjustment makes **URSUS HOME™** fit easily to the needs and dysfunctions of the child.

The compact construction of the stroller is perfect for small and tight spaces.

Thanks to the ClickClack© system we can quickly detach the seat and attach it to the other products that are in our offer (**Ursus™**, **Ursus Home™**, **Ursus Active™**). The URSUS™ seat is available in 3 sizes.

IT IS RECOMMENDED IN THE FOLLOWING CASES:

- Cerebral palsy – various types and forms.
- Brain and spinal cord injuries with lower limbs paralysis and weakness, balance and motor coordination disorders with different etiology.
- Demyelinating disease (e.g. multiple sclerosis – SM).
- Meningocele.
- Muscles diseases with weakness and paralysis (dystrophy, myasthenia gravis, myositis).
- Genetic disorders.
- Degeneration and neurological diseases.
- Other condition connected with muscles weakness, paralysis and musculoskeletal disorders.
- After head and spinal cord injuries and spine trauma with paralysis and paresis.

STANDARD EQUIPMENT:

URSUS ACTIVE™ is a special wheelchair designed for daily rehabilitation of children with locomotor dysfunctions. Furthermore, this wheelchair may be very useful concerning orthopaedic disorders and lower limbs relief needed after surgery.

The wheelchair is equipped with anti-tippers wheels that prevent the patients to tip over backwards. Optionally, **Ursus Active™** can also be equipped with push handles for a caregiver

Tilt-in-space function allows you to smoothly adjust the tilt angle of the seat which helps you to relief hips by moving the weight of body from pelvis area to the back.

Thanks to the ClickClack© system we can quickly detach the seat and attach it to other products that are in our offer (**Ursus™, Ursus Home™, Ursus Active™, Quark™**).

IT IS RECOMMENDED IN THE FOLLOWING CASES:

- Cerebral palsy – various types and forms.
- Brain and spinal cord injuries with lower limbs paralysis and weakness, balance and motor coordination disorders with different etiology.
- Demyelinating disease (e.g. multiple sclerosis – SM).
- Meningocele.
- Muscles diseases with weakness and paralysis (dystrophy, myasthenia gravis, myositis).
- Genetic disorders.
- Degeneration and neurological diseases.
- Other condition connected with muscles weakness, paralysis and musculoskeletal disorders.
- After head and spinal cord injuries and spine trauma with paralysis and paresis.

STANDARD EQUIPMENT:

Light aluminium frame | Large, inflatable rear wheels in sizes from 22" to 26" | equipped with quick-release couplings and strings | 2 independent rear brakes | Front shock absorbers | Seat unit with system ClickClack™ system for easy stick in/out | Fully reclining backrest to make the stroller as a bed (couch function) | Adjustable backrest | Anatomical lateral supports | 5-points safety belts with height adjustment | Height adjustable backrest | Angle adjustable backrest | Reflective safety marks | Pneumatic tilt-in-space system TILT-IQ© | Height and angle adjustable footrest | 5 points feet stabilizing belts with heel support and foot | abduction-adduction adjustments | Angle adjustable footplate | Breathable upholstery | Soft front bar with reflective safety marks

ADVANTAGES:

Lumbar support

It allows better stabilization of the lumbar back.

Trunk stabilizing belt

It acts as an additional trunk protection which helps to keep a proper sitting position. The belt is fastened by use of Velcro straps and its size can be adjusted to the user.

Trunk belt

Universal solution applicable to many of our products. It secures the user from falling out of the device. Anatomical shape and Velcro straps allow for a comfortable fit.

Abduction block

Shaped abduction block provides with correct seating position. Can be easily removed.

Lateral supports

Width adjustable supports that provide additional side stabilization of the trunk. You can mount it at different height.

Seat narrowing cushions 3cm

Made of elastic foam trimmed with soft material. They are attached to the seat upholstery from both sides. Thanks to them you can narrow the seat by 6cm.

Seat narrowing cushions 5cm

Made of elastic foam trimmed with soft material. They are attached to the seat upholstery from both sides. Thanks to them you can narrow the seat by 10cm.

BodyMap Stabilization

BodyMap A seat cushion

Vacuum seat cushion allows for stabilisation and proper positioning of hips.

BodyMap B Backrest cushion

The vacuum back cushion provides comfort and correction for patients with scoliosis and poor posture. Cushion maintains and controls required posture in the stroller.

Vismemo cover for BodyMap cushion

Made of thermo-active foam for extra bed sore prevention. Allows for longer and more comfortable use of the cushion.

Cotton cover for BodyMap cushion

Made of soft material it offers protection and absorbs moisture.

BodyMap spacer

Aerating-massaging pad to strengthen the prophylactic anti-bed sore function in patients using BodyMap. It can only be used together with the terry cover. The effect of being 'suspended in the air' creates a skin-friendly microclimate.
