More Information:

JUMBO positioning chair is designed for maintaining initial upright position of children when sitting. Despite its simple construction, it is a very functional and easy to operate device. It is safe for spastic as well as flaccid children with decreased muscle tone. Use of BodyMap system helps in correcting postural problems and, moreover, it may be very useful regarding orthopedic disorders. The device is equipped with a safety vest with innovative “hold & pull”© system thanks to which the child is both quickly and precisely secured in the chair. Size 3 is equipped with a folding footrest which is very helpful in placing a child in the chair.

Concerning the people and environment, the product has been made of environmentally friendly materials.

The BodyMap system includes:

- BodyMap A+ seat cushion with pelvis stabilization and abduction block – thanks to its appropriate shape, sitting in correct position is even easier and profiled abduction block prevents crossing of the legs.

BodyMap A+ cushion.

- BodyMap B+ backrest cushion with side stabilization of the trunk – it perfectly adapts to the shape of the spine ensuring additional stabilization.

BodyMap B+ backrest.

- BodyMap DZ headrest – provides correct and comfortable support for the head. It easily adapts to the head shape and thanks to the special granules, filling the cushion, you can increase the stabilization from every side.

BodyMap DZ headrest.

- Leg separator with belt – it helps to keep the lower limbs in proper position and stabilize the feet. Furthermore, it prevents crossing of the legs.

- Dual-purpose electric pump – quick and simple way to inflate the cushions, more importantly, you can form the shape of the cushion without removing the patient from the chair or stroller.

Eclectic pump.
