Notes:

STANDARD EQUIPMENT (Circle and choose options below)

For convenient and safe transportation of a second child without having to buy a double stroller. The buggypod IO has been designed so that within a few seconds it can be folded, unfolded, or completely disassembled. Using the conversion kit, you are able to convert the kid-sit into an independent three-wheeled stroller. Load capacity up to 20kg.

- 5-point safety harness
- Footrest,
- Retractable, soft touch handlebar for easier steering as both side-seat and independent 3 wheel pushchair,
- Mounting set 51

1 Size: \$1,717

TECHNICAL SPECIFICATIONS

- Max. weight – 20 kg Suitable from 6 months old
- Weight of Buggypod IO is approx. 3.5 kg
- Seat width – 27cm
- Seat depth – 29 cm
- Height of backrest – 45 cm
- Adds around 41 cm to the width of your pushchair when open
- Adds around 14 cm to the width of your pushchair when folded
- Because of the design of the Buggypod LITE or IO, they can only be fixed onto the right hand side of the pushchair when viewed from the pushing position.

FITTING

Buggypod is mounted to stroller with the aid of two catches that are mounted on the sides of frame's pipes. It is necessary to make sure that you chose places on frame as it is shown on the picture. Fastening points of catches should be placed from 16 to 37,5cm from each other. The distance for back catch from the floor should be from 35 to 42,5cm. Front catch has to be mounted at the same height as back catch or up to 8 cm higher if necessary. Additionally, if you look at the back of stroller, catches should be mounted on vertical parts of frame's pipes (not bended towards the stroller or outside). Furthermore, check if line, which passes through both fastening points, is parallel to the direction of travel.
