

Privacy Policy for Johnnys Pizzas Mobile App

Powered by Toast

Last Updated: 2/20/2025

This Privacy Policy describes how personal information is collected, used, and disclosed when you download and use the Johnnys Pizzas Mobile App (the "App"), and the choices and rights you have to protect your personal information collected via the App.

Johnnys Pizzas ("Merchant") is responsible for the personal information collected when you use the App. The App uses technology provided by Toast, Inc. ("Toast"). To learn more about Toast's privacy practices, please visit Toast's Privacy Statement at <https://pos.toasttab.com/privacy>.

Personal Information Collected Via the App

The App collects the following categories of personal information.

Contact information. You may submit your name, email, phone number, and address to the App.

- Orders and order history. The App collects and retains the orders you place via the App, including the items you order, date and time of the order, order amounts, delivery locations, tips, order frequency, favorite restaurant locations or menu items, and any preferences or selections you submit with your order.
- Payment information. You may input your payment card information, including your card number, security code, and expiration date, or provide other payment information (such as Apple Pay or Google Pay).
- Precise location. If you choose to enable it, the App will collect your precise location information to provide you with certain location-enabled features, such as to display and alert you to restaurants nearby and provide live map views. You can disable precise location at any time through your device settings.
- Rewards program and gift cards. If you participate in Merchant's rewards program or any other reward program supported by Merchant or the App, the App collects information about your rewards program status[, including your points balance and redemptions. The App also collects information about any gift cards you receive or send, including the value of the card and balances.
- Device and usage information. The App automatically logs information about you, your mobile device, and your interaction over time with the App. This includes: device information, such as your device type, browser type, IP address, device identifiers, language settings, carrier, and general location information; and usage information, such as screens you viewed, how long you spent on a page, browsing history, and access times, and page clicks, page scrolls, and page element interactions. The App also send crash reports in the event of an error for analysis and troubleshooting purposes.

How Your Personal Information is Used

Merchant may use your personal information for the following purposes:

- To provide the App and any features you use. This includes authenticating your access to the App; administering your account; allowing you to place orders and remember your preferences; processing transactions; and providing any features that you use within the App, such as location-enabled features and access to loyalty program benefits.
- To personalize your experience in the App and provide recommendations. This includes personalizing the items you see displayed in the App and recommending restaurant locations and menu items that may interest you based on your past orders and preferences. The App may also send you notifications of locations or items that may interest you. You can control notifications in your device or App settings.
- Troubleshooting and App improvement. Your information may be used to analyze the performance of the App, identify and correct errors, and develop and improve App features and functionality. Your information may also be aggregated with other users' information, or otherwise anonymized, to create statistics or for other lawful business purposes, including analytics, forecasting, and strategic planning.

Merchant may also use personal information collected through the App for the following purposes:

- To analyze users' selections and preferences in order to improve Merchant's offerings, identify opportunities for growth, and conduct market research;
