FACIALS & SKIN TREATMENTS

Facials may include deep cleansing, exfoliation, facial massage and mask. While wrapped in warm sheets and blankets to quietly rest or sleep, your skin will feel wonderfully rested and glowing. Perfect for your first facial, or for an assessment of your skin to create an on-going program. Extractions upon request, and time permitting.

Intracuticals Infusion:

The premier anti-aging oxygen infusion therapy. Intracuticals is the only treatment in the world that delivers therapeutic-grade oxygen with specially formulated vitamin-packed serums to work deep within the skin to transform each layer, inside and out. We recommend a series of six consecutive weekly oxygen-serum infusions, which will optimize results and create a cumulative benefit; followed by a maintenance regimen of every four to six weeks for continued results.

Rejuvenate ~ Opulence:

A unique serum containing hyaluronic acid and a mixture of vitamins, antioxidants, Vitamin C and alpha arbutin to instantly hydrate skin, promote natural collagen and elastin, improve texture, reduce fine lines, wrinkles and boost facial skin firmness. Perfect for hyper-pigmentation and rosacea, blocking melanin for a brighter, more even skin tone.

Single Treatment ~ 90 min. \$175

CLINICAL SKIN ENHANCEMENTS

Clinical enhancements are “working facials.” They are more structured and goal-oriented than our “relaxing” treatments and may include cleansing, exfoliation, enzymes or peels, extractions, custom mask and the selected procedure.

CHEMICAL PEELS

Peels remedy skin aging, pores, acne, hyperpigmentation, dry skin, melasma, smoker’s skin, blackheads and fine lines. The skin texture is refined; your complexion will become clearer and brighter giving you a younger, soft, fresh look.

Light to Medium Peels:

Also known as Salicylic, Lactic Acid or Vitamin A, these peels remove the outer layer of skin so that a new, smooth layer of skin is revealed. This action stimulates the production of elastin and collagen essential to healthy, youthful skin. A light chemical peel is left on your skin for a short amount of time. Shedding, flaking and redness after peel may occur.

Custom Chemical Peel Treatments. (Consultation and prior skin services required). Post-peel products required.
