

S0062490 (Conversion Pigtail)

Replace original regulator #0052795 to new regulator #0065649

Installation Instructions:

1) Remove following components from Bell Housing

- Clear Plastic Shield
- Original Regulator
- Diodes and Diode Plate
- Capacitor
- Old Wire Harness

2) Install New Regulator and Conversion Harness

- Plug in the New Conversion Harness (matching the corresponding colors)
- Regulator with Top (component side) facing toward the Bell Housing, plug in the brush leads into the brush holder.
- Using 3 self tapping screws, mount the regulator on the bearing hub.

3) Voltage Adjustment

- If output voltage adjustment is needed, the trimmer pot is located near the large capacitor and can be accessed through the vent of the bell housing.
