

#### **Background**

Australia has one of the highest incidences of skin cancer in the world. Of all new incidents of cancer diagnosed in Australia each year, 80 per cent are skin cancers. Given that children in childcare can attend during peak ultraviolet (UV) radiation times and that they spend much of their day outdoors, childcare has a major role in minimising children's UV exposure. When UV levels reach 3 or above, unprotected skin can be damaged and UV levels can reach 3 or above during most months of the year. Further, childcare provides the ideal opportunity to instil in children long-term positive SunSmart habits.

#### **Policy statement**

The Service takes every reasonable precaution to protect children and staff from the harmful effects of exposure to the sun while they are at the Service or at any event organised by the Service.

The *Sun Protection Policy* is consistent with the Cancer Council's SunSmart recommendations for outdoor environments, clothing, sunscreen, scheduling of activities, and ongoing education for the children, families and staff at the Service.

#### Strategies and practices

- To assist with the implementation of this policy, educators and children are encouraged to access and display the daily local sun protection times (available from the SunSmart widget on the service's website, the free SunSmart app, myUV.com.au or at Bureau of Meteorology).
- Additionally the service follows the Schools SunSmart No hat no play rule during the summer months, Terms one and four in the school calendar.

The sun protection times are a forecast from the Bureau of Meteorology for the time of day UV levels are forecast to reach three and above.

#### Sun protection times

UV levels vary across Australia and throughout the year. This listing highlights when UV is typically three and above in each state / territory. There may be times UV levels are three and above outside these periods.

Always check the daily local sun protection times and UV levels to be sure you are using sun protection when it is required for your location.

NSW

All year.

Extra care is taken during the peak UV radiation times and outdoor activities are scheduled outside of these times where possible.

All year.

Wherever practicable, outdoor activities should take place before 10am and after 3pm, when UV levels are lower.

# The sun protection measures listed are used for all outdoor activities **during the**daily local sun protection times.

A combination of sun protection measures are considered when planning all outdoor activities such as excursions and water play.

- The Service participates fully in the Cancer Council's SunSmart Program and accesses, and follows, the Program's resources and advice.
- The Sun Protection Policy is available to parents when they enroll their child in the Service, and their attention is specifically drawn to their responsibilities under this Policy. The Sun Protection Policy is available for parents to read at the Service.
- The sun safety message is promoted and positively reinforced amongst families through notice boards, newsletters. Educators promote sun safety awareness in children by including it in daily routines and intentional teaching such as role-modeling, discussions, SunSmart resources (for older children).
- Whenever possible, play-based learning activities are set up and moved to take advantage of shade patterns.
- Children are encouraged to choose and use available areas of shade when outside.
- In addition to be being guided by the routines and children's interests, educators take into account UV levels and local sun protection times and requirements.
- All children and educators (while in sunny areas) wear a bucket, broad brimmed or legionnaire's hat on the outdoor play area so they can move freely in the unshaded areas. Children's brim sizes are 5cm for bucket and 6cm for broad brimmed. Educator's brim sizes are 6cm for bucket and 7.5cm for broad brimmed. Peak caps and visors are not considered a suitable alternative.
- The Service has iPads. There is a designated iPad that has the SunSmart app downloaded. Educators check the app for sun protection times and UV rating times each afternoon and outdoor play in vacation care, following the app's directions when implementing sun protection strategies and programming outside play.
- Educators follow the instructions according to the UV ratings listed below:
  - 1,2 Children and educators wear a broad brimmed hat when outside
  - 3,4,5,6,7 Children and educators wear a broad brimmed hat and apply SPF 30+ (or higher) sunscreen when outside
  - 8,9,10 Children and educators wear a broad brimmed hat, apply SPF 30+ (or higher) sunscreen and play undercover when outside
  - 11+ Children and educators play indoors only.
- Children and educators adhere to the Sun Protection Policy on excursions. Refer to the Service's Excursion and Incursion Policy.
- All staff model positive SunSmart behaviour to the children by:
  - wearing broad-brimmed or legionnaire styled hats and appropriate clothing for all outdoor activities while in the sun.

- o using SPF 30 (or higher) broad-spectrum, water-resistant sunscreen
- o seeking shade whenever possible
- o wearing sunglasses that meet the Australian Standard (AS/NZS1067).
- Choosing Sun Protective Clothing
  - The more you cover the safer
  - o Stay away from see through, sheer type clothing. If you can see through it, so can UVR
  - Layering clothing can help protect against sunburn
  - The darker the clothes the more they help protect from UV
  - Wet clothing offers less protection against UVR. Wear dry clothing or clothing that dries quickly
  - Opt for UVR blocking clothing wherever possible when out in the sun for long periods of time
- The Service supplies 30 (or higher) broad-spectrum water resistantsunscreen for children and staff. The sunscreen is available in each room and in the outdoor play area. Parents are required to notify the Service in writing if their child is allergic to sunscreen, and to supply an alternative clearly labeled with the child's name.
- Sunscreen is applied in accordance with the manufacturer's directions (which state to apply at least 20 minutes before going outdoors and reapply every two hours (or after sweating, towel drying or swimming).
- To help develop independent skills for school, children are encouraged to apply/given opportunities to apply their own sunscreen under supervision of staff and are encouraged to do so.
- Sunscreen is stored in a supervised, cool place, out of the sun and the expiry date is monitored.
- Where children have allergies or <u>sensitivities to sunscreen</u>, parents are asked to provide an alternative sunscreen or children are encouraged to play in the shade.
- Cancer Council recommends a <u>usage test</u> before applying a new sunscreen.
- Any child who does not bring their own hat is expected to use one from the Service's set of spares kept for the purpose, or to play in the shade. If the spare hat and clothes supply is exhausted, the children without hats or suitable clothing will be required to play indoors in shaded areas.
- Educators ensure children wear clothes with adequate protection from UVR when playing outdoors. Any child who does not have suitable clothing is expected to wear clothing from the Service's set of spares kept for the purpose, or to play in the shade. Also if the spare clothes supply is exhausted, the children without suitable clothing will be required to play indoors or in

shaded areas. The Cancer Council recommends loose fitting clothes with collars and sleeves, closely woven natural fibre fabric, and of a dark colour.

- Water is offered to children frequently throughout the day regardless of whether they are indoors or outdoors.
- Educators liberally apply broad spectrum sunscreen with an SPF of 30 to all exposed areas of children's skin 15-20 minutes before the children go outside, and initial the <u>Sunscreen</u> <u>Application Chart</u> to that effect.
- Educators reapply sunscreen every two hours if children are outdoors for a prolonged period, or more frequently if the children are perspiring or involved with water play. Older children apply their own sunscreen under supervision.
- If parents supply their child with sunglasses that are wrap-around and/or are close fitting (that meet AS 1067-EPF 10 is best), educators will ensure children wear them during outdoor play.
- Educators are kept up-to-date with SunSmart recommendations.

#### Responsibilities of parents

- To bring a hat for their child by the Service each time their child attends the Service, and to ensure the hat is clearly named and kept clean.
- To dress their child in SunSmart clothing, including spares, each time the child attends the Service.
- SunSmart clothing is made of fabric such as cotton and covering as much skin as possible and is loose fitting.
- To model positive SunSmart behaviour to the children when at the Service.
- To notify the Service in writing if their child is allergic to sunscreen, and to supply an alternative sunscreen clearly labelled with the child's name.

Please note: Certain health conditions and medications mean some people are more sensitive to UV radiation and need to use sun protection at all times regardless of the UV levels. Please make sure your policy includes the particular needs of these children and staff at your service. For further information visit <u>Cancer Council Australia's website.</u>.

#### **Policy review**

The Service encourages staff and parents to be actively involved in the annual review of each of its policies and procedures. In addition, the Service will accommodate any new legislative changes as they occur and any issues identified as part the Service's commitment to quality improvement. The Service consults with relevant recognised authorities as part of the annual review to ensure the policy contents are consistent with current research and contemporary views on best practice.
