

Prompt Template Library for Nurse Educators

Smarter Prompts. Stronger Learning.

This template library offers ready-to-use AI prompts to support nurse educators in enhancing teaching, simulation design, curriculum development, and student engagement. Each template can be customized to suit your specific content area, learning objective, and level of student readiness.

Clinical Reasoning & Decision-Making

- You are a nursing student caring for a patient with [condition]. What are the top three priority assessments and why?
- Simulate a clinical scenario where a patient with [symptom] deteriorates rapidly. Include cues and require a response based on the SBAR format.

Study Guide Creation

- Create a student-friendly study guide on [topic] with bullet points, key terms, and a quiz at the end.
- Summarize the main points from this nursing concept: [paste text or lecture notes]. Format it as a cheat sheet for fast review.

Lesson Planning Support

- Design a 60-minute interactive lesson plan for nursing students on [topic] including objectives, active learning strategies, and assessment methods.
- Give me three icebreaker activities to introduce the topic of [nursing concept] in a way that's relevant to Gen Z learners.

Writing & Reflection Prompts

- Write a reflection prompt for students after completing a simulation on [topic] that encourages metacognition and self-assessment.
- Create a writing assignment for students that explores ethical issues related to [clinical scenario or emerging technology].

Communication & Soft Skills

- Generate a role-play scenario between a nurse and a patient with low health literacy discussing [treatment or procedure].
- Create a debriefing discussion guide for students after a communication error involving a shift handoff.
