THE CHARITY FOR DISABLED CHILDREN

A portable, flexible bed system to help children and young adults who need a well-padded safe and comfortable space to sleep when at home and away from home

The clever Home and Away design allows fast assembly and dis-assembly using strong zip and Velcro fastenings – it can be used on holiday or at home when a safe secure padding space is needed. Each separate section is lightweight so lifting and carrying is strain free with all parts fitting in most standard cars.

A single parent or carer is able to assemble the cot and once constructed, it provides a strong and sturdy space. The heavy-duty fixings, which include a front and back robust door brace, ensure children can be kept safe and secure.

The Home and Away bed can be custom made in a variety of widths, depths and heights so that a vast range of users can be accommodated. The safety padding can be handmade in any choice of colour or with engaging patterns for users to enjoy whilst relaxing in their own space.

If users and those helping them require powered assistance, then a mechanism providing height adjustment and profiling

can be added under the mattress. This provides personalised positioning for users when sleeping and safe working heights for carers and parents – reducing the risk of back injury.

The Home and Away is a welcoming space with plenty of visibility inside and out so users and families have visual reassurance and access at all times. This is provided by large, soft-touch windows which can be positioned in a variety of positions.

As with all Theraposture products, the Home and Away bed is available with a range of specialist mattresses for varying needs. These include solutions for pressure management and they all have wipe down easy-to-clean surfaces.

Theraposture understand and solve individual needs... always

Theraposture provide lasting quality solutions that are individually specified following a full assessment of risks, needs and wants. All products (including bespoke orders) come with a 14 day Suitability Guarantee for complete reassurance and peace of mind.
