# Working with you to find solutions

## Supporting OTs to support families

Our expert team will work with you to provide **excellent solutions to cater to the complex care needs of your clients**, with a full range of specialist bathing, patient handling and changing and showering products.

## On-Site Demonstrations

We understand how important it is to assess a client's needs thoroughly, and that is why we offer on-site demonstrations of equipment so that your families can experience the equipment first hand to ensure that it fits their requirements completely.

## Site Surveys and CAD Designs

Planning is key, and our experienced team will conduct a site survey, and work with you to propose a perfect solution. A detailed plan and CAD design will be provided with each quotation – free with no obligation.

## Support Cushions and Bolsters

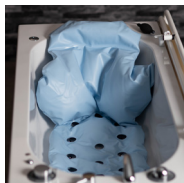

### Astor Grip Strip Bolsters

A range of bolsters with a 'Grip Strip' system which will hold the bolster in place on any dry surface by simply applying a small pressure over the grip strip. The bolsters can be easily removed and repositioned time and time again by simply peeling the bolster away from the surface it is 'gripped' to.

### Vacuum Support Cushions

Internal mouldable bath cushions and supports are a simple and cost-effective way to transform the bathing experience. Made from a waterproof vinyl material filled with small polystyrene beads, these full body or head supports will fit inside any standard or assisted bath. The hand vacuum pump attached is used to remove the air from the cushion creating a firm, flexible and comfortable supportive base, moulded to individually suit the bather.

### Base and Side Cushions

If a little extra padding is required within the bath, Astor Bannerman offer a range of base and side cushions. If used in conjunction with spa option, the base cushion can be provided with holes to allow the spa feature to be maximised.

# Astor Neatfold Bath Cradle

For extra bathing support

## Ergonomically shaped to support a naturally relaxed bathing position

Additional adaptable side supports, headrest and lap belt give added support where required. Available to fit the range of Astor height adjustable baths.

### Ergonomically shaped for comfort and support:

With option of extra head rest and side bolsters to provide extra support

### Removable washable mesh cover:
