

Policy Governing Score Corrections and Correction Period

It shall be the policy of Unit 547 operated games that any scoring change must be verified with both pairs (or teams) involved. If the need for a scoring change comes in after the game, it is the responsibility of the pair (or team) reporting the error to consult with the other pair (or team) to seek agreement. In the rarest cases where there is a discrepancy, the evidence is gone, and the two sides do not agree but have credible arguments, the director shall have the option to assign non-matching scores.

The correction period shall end one hour after results are posted to the web site, or 10 P.M., whichever is later. Once the correction period is closed, no further changes can be accepted. Scoring corrections reported after that time cannot be accepted. The director will explain the correction period and this policy to parties seeking the correction.
