# Hublet Solution

The Hublet Solution is a comprehensive SaaS platform. It streamlines digital content and device management for organisations, facilitating effortless content curation and sharing across multiple devices, while ensuring robust security features.

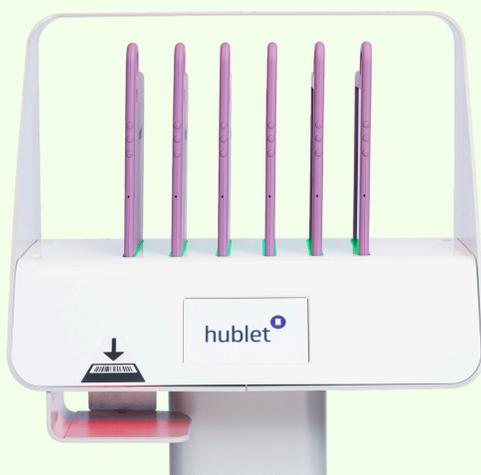

- ✅ **Hublet Manager**, a browser–based platform, is a centralised tool with efficient content, device, and integration management capabilities.

- ✅ **Hublet Profiles**, at the core of Hublet Manager, simplifies every step of curating profile–based content to create engaging experiences for your users.

- ✅ **Hublet App** is a mobile application designed to help you distribute your digital content with personalised Hublet Profiles on shared devices easily.

Your Content, Your Way – on Your Tablets, from Single SaaS Platform.

Hublet One and Hublet Dock

These innovative Hublet add–ons enhance the functionality and versatility of the Hublet Solution.

- ✅ **Hublet One** presents the dynamic features of the Hublet Solution with added flexibility. It is running on Android tablet, with a straightforward and intuitive interface. Available in a purple protective case by default.

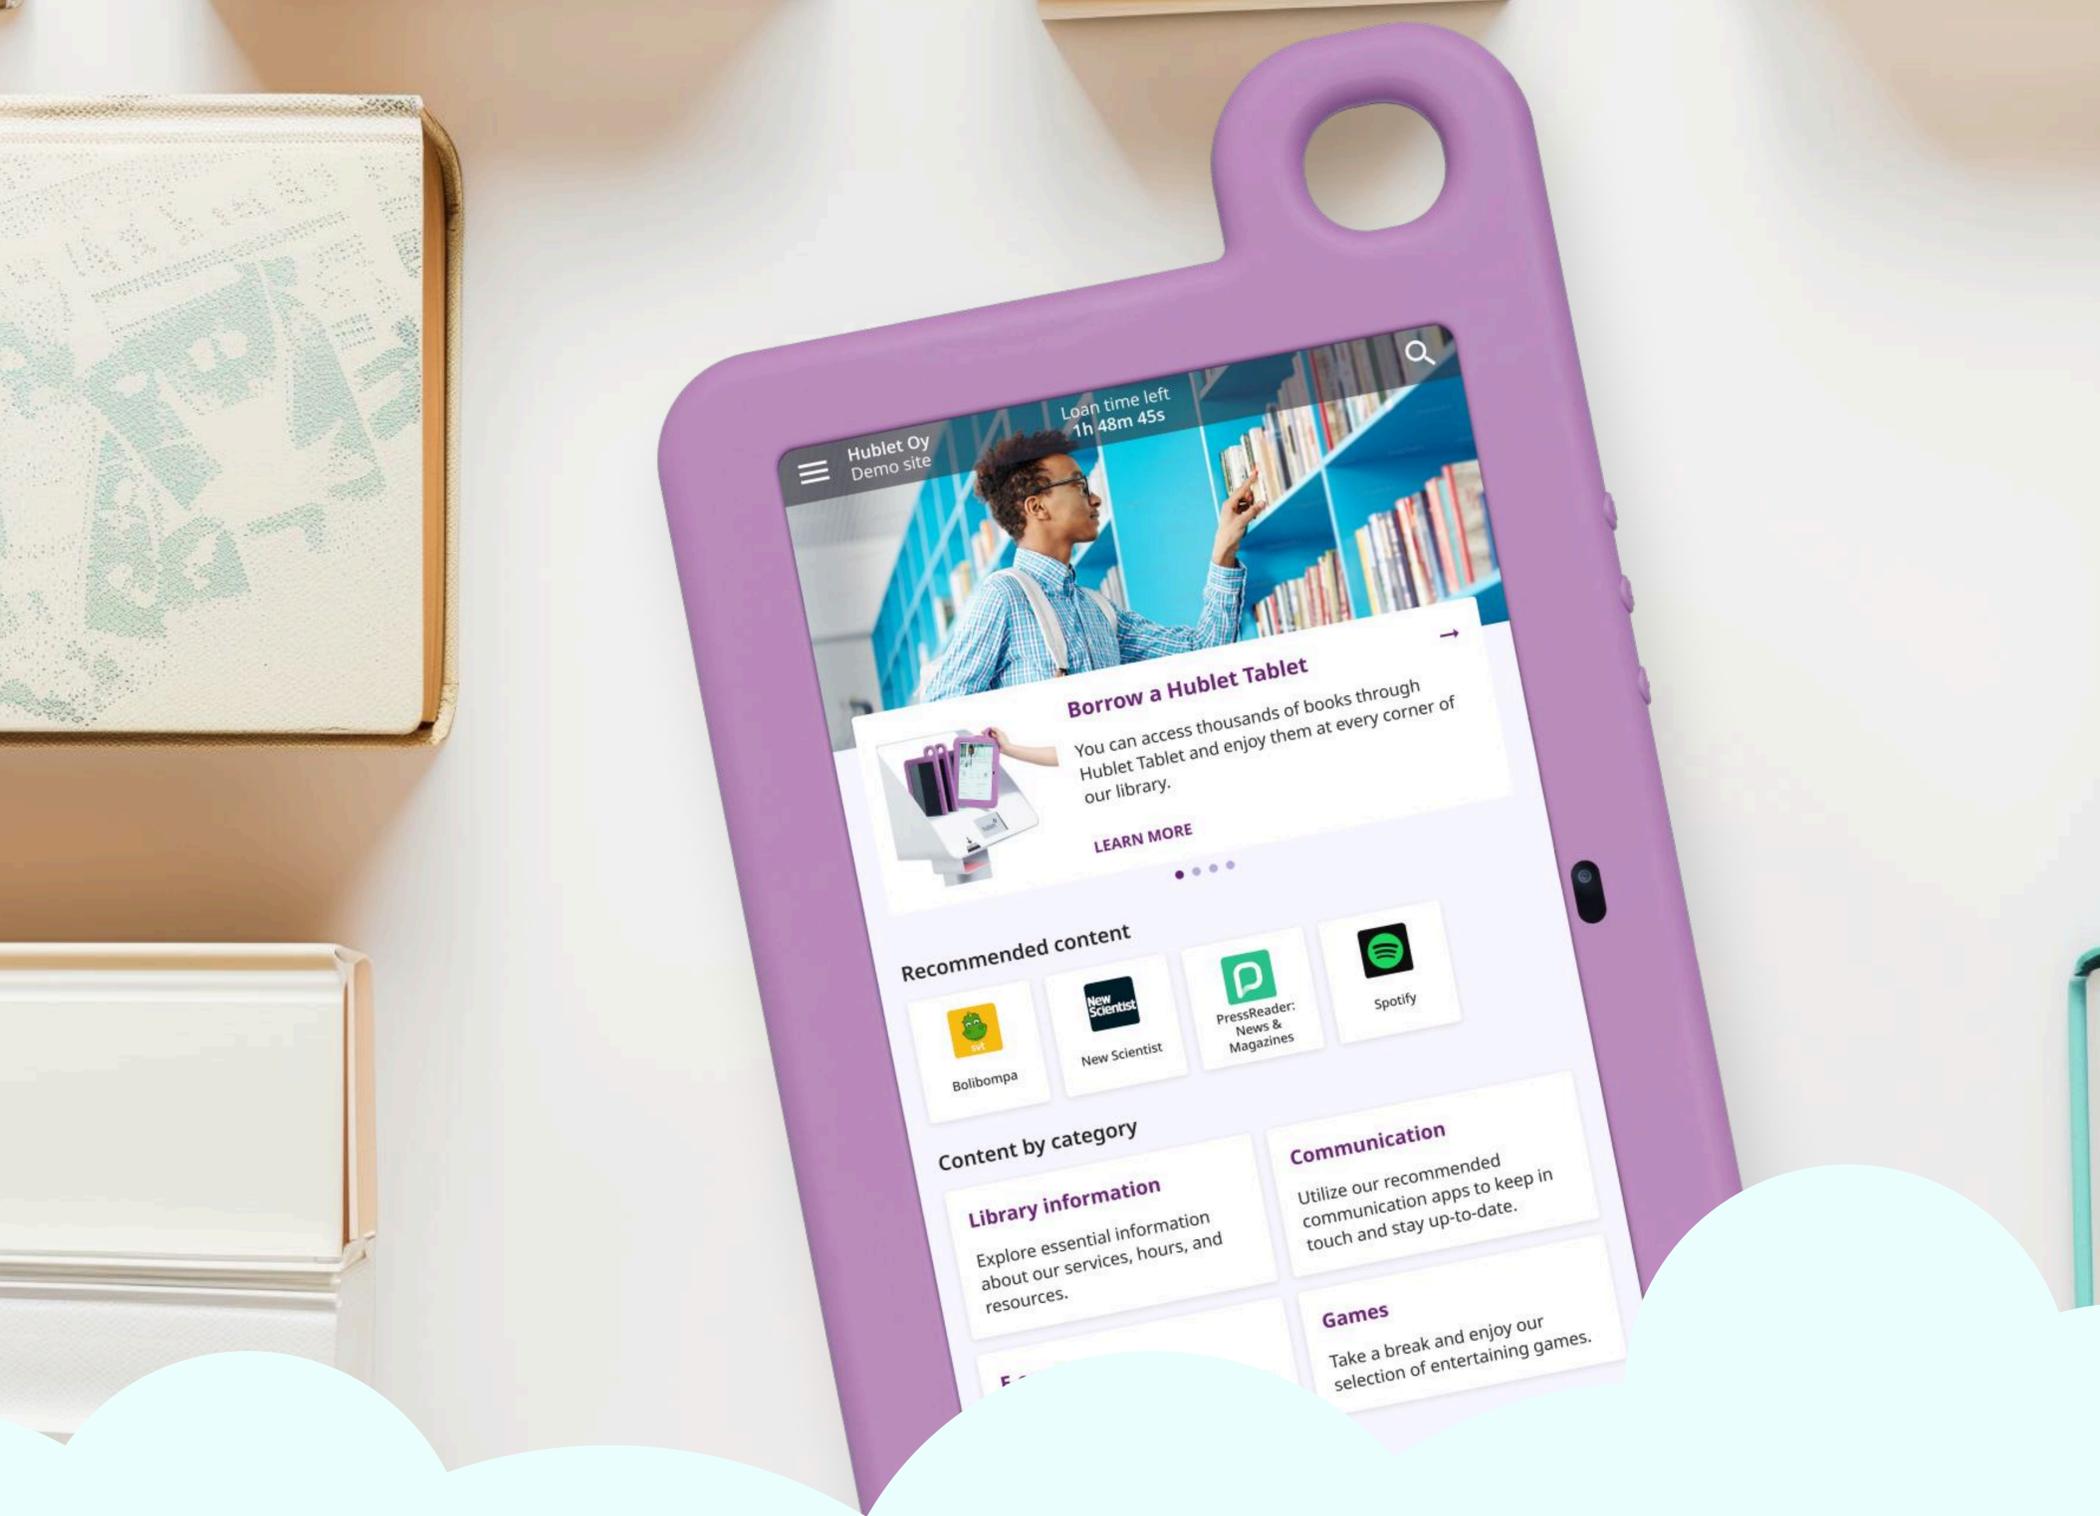

- ✅ **Hublet Dock** provides a completely secure space for your Hublet One to be displayed, charged and data wiped (on return), without staff intervention.

Hublet for Library

It's perfect for providing tailored, personalised digital content with profiles catering to diverse age groups and preferences.

Enhance digital inclusion by customising content for all users: offer digital resources for children's hobby clubs, gamify the library experience for teens, provide e-books or e-magazines for adults, and empower elderly patrons with resources for everyday tasks, among other possibilities.

- ✓ Integrate quickly with any library management system.

- ✓ Create, curate, and personalise user profiles effortlessly using ready-made templates.

- ✓ Allow visitors to access your digital catalogue independently, anytime, from anywhere.

- ✓ Save staff time with the Hublet Dock self-service station and automatically app updates.

- ✓ Automate loan authentication and device tracking for efficiency.

- ✓ Work only within authorised networks, safeguard against device settings and content alterations.

- ✓ Secure user privacy by automatically erasing personal data after each use on shared devices.

- ✓ Reduce paper prints and minimise staff administrative tasks.
