

I have 2 sets of 4 panels each— similar to these below— with wonderful transparency and depth— 8” x 4 ft each. These are my resin and acrylic work that I was going to be offering through a showroom and folding over the tops and bottoms.

But— technical issues have prevented me from completing them like that. They can be displayed with “stand offs” to bring them about 1.5” above the level of the wall.

This is a commission project— and is not suitable for a showroom as it needs to be fixed to a wall.

So— here they have sat— unfinished for a year!

Please email me with any interest...
