

# Gigahertz Solutions - HFE35C RF Meter

## Frequency Range of Meter:

27 MHz to 2.7 GHz

**Measurement Ranges:** Fine: 0.1 – 199.9  $\mu\text{W}/\text{m}^2$  – Resolution 60 dB  
Coarse: 1 – 1999  $\mu\text{W}/\text{m}^2$  – Resolution 50 dB  
**Antennas:** True Logarithmic Periodic Antenna 800 MHz – 2.7 GHz vertically

Dr Vlrre— info as you requested:

In your clinic on 4-8-22, I gave a demo of this RF meter next to my government cell phone (which I think is 3 or 4G.)

I said the use of all of the various forms of Wireless devices— cell phones, wearables, VR, Smart technology etc, are all predicated on the notion that WiFi is safe— and it is not.

The audio on the meter was loud as I turned on my phone and set it next to the meter. The display went from under 100 to 1— which means I could have pushed it up the next level. I am not an authority on this meter but the links to the site where it was purchased and more info are listed below.
