To Whom it may Concern,

Classic Stone, Marble & Granite Fabrication is a premier, full-service marble and stone installation company. We provide professional high-end design, indoor and outdoor project planning, and quality installations. Our creations for home owners, designers and builders, enable us to truly say that we have developed some unique and innovative solutions. Rick & Debbie Perry, of Your Strategy Partners, (broker for American Incentive Advisors) told me that many businesses in the Construction Industry (like ours) could be qualified for the Research and Development tax credit if they develop, design, create, innovate, make and modify any aspect of their business.

Our business is family-owned, and we! learned our business would qualify for business tax credits and incentives, and that each owner would have the opportunity to recover overpaid taxes from the IRS!

The tax team went back 3 years and helped each of us qualify for a very nice recovery. Our entire family was able to benefit by recover these overpaid taxes.

We heartily recommend that any construction company creating innovative solutions should meet with Your Strategy Partners to get a free estimate of how much you may be able to qualify to recover.

Sincerely,

Piotr Banski, Co-Owner
Classic Stone, Marble & Granite Fabrication
