# What's included in individual sets?

You can choose from Nestbox camping kit in several configurations, so-called sets, according to your preferences and needs. These sets then differ not only in their composition but also in price.

## Complete set+

This includes everything as a complete set with the difference that certain camping kits allow use of certain improvements to the sleeping set, labeled as PLUS. This variant refers to an upgrade when the bed uses a bed base with side rails and a mattress with side parts for maximum utilization of the vehicle sleeping width. This will extend your sleeping width by 15 cm / 5 7/8" on each side. As a rule, this is enabled in the area of the rear door at the second row of seats where the vehicle is wider than in the trunk. The PLUS variant already comes as the basic configuration of the basic configuration of Nestbox Camper 200 and Hiker 410.

## Sleeping set+

This is comprised of the body and bed (bed base support, bed base and mattress). This set does not contain the water module and the cooker module. Again, this is an upgrade. For the bed, a bed base is used with side rails and mattress with side parts for maximum utilization of the vehicle sleeping width. This will extend your sleeping width by 15 cm / 5 7/8" on each side.

## Kitchen set

It consists of the main body, water module and cooker module. This set does not contain a bed. The fridge is not included in the price.

# Nestbox diagram

Exact technical specifications and storage space depend on the type of camping kit.

# Nestbox Roamer 400

ex NST RO 700

### Complete set+

body, removable water module and cooker module, storage space intended primarily for a fridge, bed (bed base with side rails, bed base support, mattress with side parts)
