MedEnvoy Global B.V.  
Prinses Margrietplantsoen 33 - Suite 123  
2595 AM The Hague  
The Netherlands

## Hold-It justification

The Hold-It device was developed to provide partial hand patients with a device to assist them with grasping and stabilizing objects such as a toothbrush, pen, knife, fork or spoon to improve their function for activities of daily living. The Hold-It device can be positioned by a friction and can also be removed if necessary by opening a lever on the side.
