

M-Fingers

Product descriptor

The M-Fingers consist of multi-articulating fingers offered in 5 sizes and 3 colors. The M-Fingers are able to conform around objects providing a more secure and confident grip for the user. They were designed to be simple to operate and controlled by the users own motion. By the user having direct control of the fingers, this will allow them to perform tasks more effectively, more responsively, and with optimized precision. The M-Fingers were specifically formulated with strength and durability in mind. Our fingers perform a multitude of tasks throughout the day, which is why the M-Fingers were designed with high strength composite materials and extremely durable over-mold materials to provide the strength and durability necessary for long-term use.
