

TITAN Thumb MSRP

L7499- TITAN Thumb, ratchet style, complete prosthesis- \$26,889.00

Titan Thumb justification

The Titan thumb is available in 3 adult sizes and provides the user with 5 locking positions and full rotation. The thumb is manufactured out of Titanium and hardened steel and designed for heavy duty use. The thumb would be added to a custom-built prosthesis to allow for a sturdy multi-positional opposition post to the remaining fingers. The Titan thumb is indicated for someone with a complete absence of their thumb.
