Healing Arts Connection has been a distributor of
TriVortex Technology healing tools since 2004.

About Tri-Vortex

Tri-Vortex Technology, developed by Brian David Andersen, is a very powerful system that imprints objects with the harmonic energy patterns of Hydrogen, Oxygen and Gold. Objects treated by the Tri-Vortex Technology become useful as healing tools, water and liquid purifiers and energizers.

When fluids (humans are 65% plus water) come in contact with healing tools treated by the Tri-Vortex Technology, the molecular structure of the fluid becomes organized and coherent. The coherent molecular structure of the fluid promotes maximum and rapid absorption into human cells as well as releasing tension in the body. Total absorption of fluids into the cells promotes youth, energy and vitality no matter what age or body type.

Individuals working with the healing tools treated by the Tri-Vortex Technology have felt relief from pain and physical tension and improvements in emotions and energy levels when using the healing tools treated by the Tri-Vortex Technology.

Tri-Vortex Healing Tools

- Pashmina Shawls
(wash on gentle/line dry)

No claims or implications are made about treating or curing human diseases by any Tri-Vortex Product. The Tri-Vortex Products simply support instant muscle relaxation and fast pain relief related to most conditions.

Test for Yourself!

Better Tasting Liquids

The liquids in your body and saliva in your mouth have a specific and particular molecular organization. Most liquids consumed by humans have molecular chaos and a tart after-bite. The tart after-taste indicates the body will not efficiently absorb the liquid or nutrients into the cells.

When the Tri-Vortex Product treats any liquid or solid food for 30 seconds, the liquid or solid food tastes smoother and is without a tart taste. The smoother taste indicates the nutrients in the organized liquid or solid food will be more fully absorbed by the cells of your body.

Steel Plates

Simply place the plate against any liquid container made from any material or any solid food for 30 seconds. The brief treatment by the Tri-Vortex Products dramatically improves the taste and quality of any liquid or solid food. Create your own "double blind" smell and taste tests to prove that the superb Tri-Vortex Products really work.

Long Lasting or Temporary Results?

Long lasting? Potentially, very definitely. Tri-Vortex will be no different from anything else in the sense that it is never medication or treatment alone that brings about the desired result or even eliminates the cause of the distress. Healing must always be considered from a holistic point of view and Tri-Vortex represents only part of the mind-body-spirit healing picture.

True healing happens when people are prepared to make the right combination of personal shifts and changes: hydration, diet, exercise, belief systems, habits, prayer, faith and self-love. Good questions to ask include, "Do I want to get better? When I am better, what will change in my life? Am I worthy of the "good life"?"

Stretch Test

Scarves, Shawls, Veils

Everyone, no matter if you are a couch potato or a yoga instructor, has a sore, aching or "catch point" in the lower back, hamstrings or knees when you lock your knees straight and attempt to touch your toes. The Tri-Vortex Technology significantly relieves the achy soreness or the "catch point" in the lower back, hamstrings or knees in a few minutes while touching your toes or other stretch exercises.

Directions

Make sure that:

1. No Tri-Vortex Product has been exposed to your test subject for 24 hours.
2. The individual locks knees.
3. The individual lifts hands above head.
4. The individual slowly bends over and attempts to touch toes.
5. The individual attains maximum stretch point.
6. The individual holds maximum stretch point for three seconds.
7. The individual lifts hands above his/her head.
8. Individual identifies place on his/her body that is the achy, sore "catch point."
9. Individual repeats steps two thru eight (optional)
10. Tri-Vortex Product is placed on achy sore "catch point" for three to five minutes.
11. Repeat steps 2 thru 8.

Has the achy sore "catch point" significantly changed and become less achy and sore or gone all together? Brian David Andersen, Tri-Vortex distributors and purchasers have successfully conducted this test on literally thousands of individuals with positive results.

Simple Applications and Uses

Simply place steel plates, magnetic jewelry, or fabric on the area of your body experiencing fatigue or pain. Leave it there for 30 seconds or longer.

Travelers find that wrapping themselves in a shawl on long airplane trips reduces jet lag and fatigue.

Those using the shawls during meditation experience deeper meditations with increased peace and relaxation.

Office workers find the comfort of a scarf or shawl reduces stress and increases feelings of well-being.

Yoga and exercise flow easier with a pashmina sash.

Treat water for a few seconds before drinking (pets too).

Pets love to curl up with a pashmina.
