About MANPROCES

At MANPROCES, we offer professional solutions for managing NOM certifications. We carefully select our network of testing and certification providers to ensure the best price, quality, and response time.

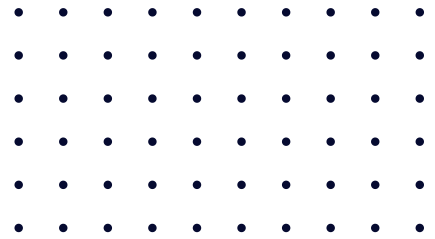

ACELERA TU IMPORTACIÓN

Con el respaldo de expertos en
certificaciones NOM

Test and Certification

TEST

We select the best option within our supplier network based on your needs. We handle all sample management, adjustments, and requests until we receive your compliant lab report.

CERTIFICATION

With our comprehensive service, we ensure compliance with the regulations applicable to your products, managing everything from testing, file creation, and applications to obtaining your NOM certificate.

Other procedures and services

Out of Scope Letters Technical Opinion

We assess the scope of Mexican Official Standards based on your products and needs to verify their application or exception to the standard, under a document issued by a Certification Body that endorses the verdict.

Commercial information

We provide guidance and manage your certificate that guarantees compliance with the marking of your packaging, warranties and manuals in accordance with the established commercial information standards.

Telecommunications and wireless

We manage the entire testing and certification process for wireless technologies within the scope of official Mexican standards, such as Wi-Fi, Bluetooth, Cellular Bands, Public Networks, SAR, and others.

IFT Certification

We ensure compliance with and registration of your IFT approval with the Federal Telecommunications Institute (IFT) to maintain the validity of your NOM certifications, as well as the certifications issued by accredited experts (peritos).

Costums Letters

With a customs letter, it is possible to import a product without a NOM certificate, considering it as a sample for testing and certification purposes to obtain official Mexican standards.

Import and Logistic

We manage and provide solutions for importing samples for testing purposes, as well as for certified products. We offer logistics services for distributing your products to your distributors, points of sale, or warehouses.

Other procedures and services

Creation of
technical documentation.

Management of registrations
with CB, LAB, IFT, etc.

Local Representation

We help you comply with your certifications. We help you gather, supplement, and create the manuals, technical sheets, diagrams, warranties, packaging, labels, and other documents necessary for regulatory compliance.

We compile your legal information so we can generate the necessary contracts to register with the agencies, laboratories, institutions, inspection units, and departments required to obtain the regulatory documents.

If you don't have an established office in Mexico, we can help you manage your activities and operations in Mexico through our local representation service.

CERTIFICA HOY

5.0

Service Request Process

PHASE 1

Technical information is sent so our team can analyze the applicable standards.

PHASE 2

Once the scope of the project is determined, a quote is shared with the information required to begin the service.

PHASE 3

The opening is confirmed once payment is received, an invoice is issued, and samples are received for testing, along with technical information.

PHASE 4

The samples are submitted to the testing laboratory, a technical file is created, and the test report is analyzed.

PHASE 5

If there are deviations found by the OCP, they are addressed, and a Certificate is obtained.

PHASE 6

Once the service is completed, the samples are returned or sent for recycling according to the client's instructions.

PHASE 1

Sending technical information

PHASE 2

Sending a Commercial Proposal (Quotation)

PHASE 3

Acceptance, payment and project opening

PHASE 4

Test management, file management, and handling of deviations.

PHASE 5

Certificate Issuance

PHASE 6

Return of samples or sending to recycling
