Genetically modified salmon heading to US dinner plates

INDIANAPOLIS (AP) — The inaugural harvest of genetically modified salmon began this May after the pandemic delayed the sale of the first such altered animal to be cleared for human consumption in the United States, company officials said.

Several tons of salmon, engineered by biotech company AquaBounty Technologies Inc., will now head to restaurants and away-from-home dining services — where labeling as genetically engineered is not required — in the Midwest and along the East Coast, company CEO Sylvia Wulf said.

Thus far, the only customer to announce it is selling the salmon is Samuels and Son Seafood, a Philadelphia-based seafood distributor.

AquaBounty has raised its faster-growing salmon at an indoor aquaculture farm in Albany, Indiana. The fish are genetically modified to grow twice as fast as wild salmon, reaching market size — 8 to 12 pounds (3.6 to 5.4 kilograms) — in 18 months rather than 36.

The Massachusetts-based company originally planned to harvest the fish in late 2020. Wulf attributed delays to reduced demand and market price for Atlantic salmon spurred by the pandemic.

"The impact of COVID caused us to rethink our initial timeline ... no one was looking for more salmon then," she said. "We're very excited about it now. We've timed the harvest with the recovery of the economy, and we know that demand is going to continue to increase."

Although finally making its way to dinner plates, the genetically modified fish has been met by pushback from environmental advocates for years.

The international food service company Aramark in January announced its commitment to not sell such salmon, [citing](#) environmental concerns and potential impacts on Indigenous communities that harvest wild salmon.

The announcement followed similar ones by other major food service companies — Compass Group and Sodexo — and many large U.S. grocery retailers, seafood companies and restaurants. Costco, Kroger, Walmart and Whole Foods maintain that they don't sell genetically modified or cloned salmon and would need to label them as such.

The boycott against AquaBounty salmon has largely come from activists with the Block Corporate Salmon campaign, which aims to protect wild salmon and preserve Indigenous rights to practice sustainable fishing.

"Genetically engineered salmon is a huge threat to any vision of a healthy food system. People need ways to connect with the food they're eating, so they know where it's coming from," said Jon Russell, a member of the campaign and a food justice organizer with Northwest Atlantic Marine Alliance. "These fish are so new — and there's such a loud group of people who oppose it. That's a huge red flag to consumers."

Wulf said she's confident there's an appetite for the fish.

"Most of the salmon in this country is imported, and during the pandemic, we couldn't get products into the market," Wulf said. "So, having a domestic source of supply that isn't seasonal like wild salmon and that is produced in a highly-controlled, bio-secure environment is increasingly important to consumers."

AquaBounty markets the salmon as disease- and antibiotic-free, saying its product comes with a reduced carbon footprint and none of the risk of polluting marine ecosystems like traditional sea-cage farming carries.

Despite their rapid growth, the genetically modified salmon require less food than most farmed Atlantic salmon, the company says. Biofiltration units keep water in the Indiana facility's many 70,000-gallon (264,979-liter) tanks clean, making fish less likely to get sick or require antibiotics.

The [FDA approved the AquAdvantage Salmon](#) as "safe and effective" in 2015. It was the only genetically modified animal approved for human consumption until federal regulators [approved a genetically modified pig](#) for food and medical products in December.

Picnic and Swap Meet at Tomorrows Meeting

Tuesday, June 29, 2021 Member Meeting – 7 pm at River Bends Park on 22 Mile Rd. in Shelby Twp.

The agenda for this evening's meeting features a pot-luck dinner and a swap meet. DAS will provide an entrée (word has it the club chef and crew will be grilling some tasty hot dogs and brats!) and each member is requested to bring a dish to share. If you plan on bringing something, it would be very helpful to reply to this same post on the message board (under the DAS News and Announcements forum) with a message stating what you intend to bring. This would minimize the number of duplicate items by letting everyone else know your intentions.

Please note: the tables under the pavilion will be needed for sharing the meal so if you plan to bring something you intend to swap or sell, bring a portable table that you can display your items on.

We also intend to carry on with normal meeting agenda items (new member introduction, raffles, SOTY, AOTY, fishing reports, SIC). Lets all hope for favorable weather and a good member turnout.

Blame it on the covid...Onekama SOTY schedule change

Thanks to a little schedule snafu, the SOTY tournament boats will make their second stop at the port of Manistee on Saturday, August 7th. DAS skippers were originally planning to visiting the port of Onekama in August. Unfortunately, the high demand for boat docks on Portage Lake, and extenuating covid circumstances have forced the relocation of this event to Manistee.

Onekama is situated between the ports of Arcadia and Manistee and the fishing in early August can be incredible. Last time we held a club tournament in Onekama, we hosted it at the historic Portage Point Inn. The docks are nice but an entire pier was lost due to last year's record high waters. They normally offer transient docks, but a large wedding party has booked the limited number of transient slips the weekend we hoped to stay.

Our backup plan was to stay at Onekama Marine. They operate two marinas on Portage Lake and normally have ample docking. This year however, because there's an unprecedented demand for boat docks, and problems hiring summer help, management of the marina has decided to only rent docks by the season. The good news is you can still fish waters near Onekama, is we won't be far. The Portage Lake pier heads are only ten miles from Manistee.

If your looking for budget accommodations in Manistee you might want to check out the 90 year old SS City of Milwaukee. The retired car and rail ferry offers a selection of the ships 14 rooms at modest prices. You will share a bathroom, but bunks can be had for as little as \$25/person. If you want to check it out, visit their Air BandB site, or to speak directly with a staff member, please contact sscityofmilwaukee@gmail.com or phone 231-723-3587

If you have any questions about places to stay , dock, or fish, feel free to ask the Port Captain

Tom Gorguze

May meeting recap - River Bends Park, Shelby Township

The May 25, 2021 member meeting finally brought us face-to-face with our 'new' normal. We don't have a brick and mortar venue right now but that can come later. What we do have is a fishing club that is back in action and happy about it. Forty four members showed up at River Bends Park where we listened to a presentation delivered by Rob Pinskey and Ed Phalig on river fishing for walleye on the St. Clair River. This was timely as our next Angler outing is for walleye out from the City of St. Clair. Rob and Ed did a great job and we are all better after hearing from them.

After the feature presentation we held a full program where we heard results from the Angler of the Year events presented by Blaise Pewinski (Oscoda, Algonac) followed by the Skipper of the Year tournaments presented by Bob Feisel (St. Joe, Grand Haven). Individual standings and the upcoming schedule were revealed along with one recent schedule change where we replaced the July 10 event in Sebawaing with fishing out of Linwood.

Next, we heard from Rodney Elnick on the success of the three recent Salmon- in- the- Classroom releases. Following Rodney came the Tackle

Raffle and 50:50 drawing held by Jeff Bustos and Jim Zanke respectively. Fred Chartier won the \$80 50:50 and he also won the \$50 Every Member drawing.

The finally of the meeting was the raffle drawing for the Ludington instructional charter donated by Mark Williams of Silver Addiction. Carl Ventimiglia did another masterful job selling all 100 tickets and the proceeds from this drawing will go a long way helping the club through a difficult year. Scott Obarzanek won the first one and Anna Kulpa was the winner of the second drawing.

I think everyone had a good time and I look forward to doing again at River Bends Park on June 29.

Genetically Engineered Salmon

Continued from Pg 1

In 2018, the federal agency greenlit AquaBounty's sprawling Indiana facility, which is currently raising roughly 450 tons (408 metric tons) of salmon from eggs imported from Canada but is capable of raising more than twice that amount.

But in a shifting domestic market that increasingly values origin, health and sustainability, and wild over farmed seafood, others have a different view of the salmon, which some critics have nicknamed "Frankenfish."

Part of the domestic pushback revolves around how the engineered fish is to be labeled under FDA guidelines. Salmon fishermen, fish farmers, wholesalers and other stakeholders want clear labeling practices to ensure that customers know they're purchasing an engineered product.

USDA labeling law directs companies to disclose genetically-modified ingredients in food through use of a QR code, an on-package display of text or a designated symbol. Mandatory compliance with that regulation takes full effect in January, but the rules don't apply to restaurants or food services.

Wulf said the company is committed to using "genetically engineered" labeling when its fish are sold in grocery stores in coming months.

In November, U.S. District Judge Vince Chhabria in San Francisco affirmed that the FDA had the authority to oversee genetically engineered animals and fish. But he ruled that the agency hadn't adequately assessed the environmental consequences of AquaBounty salmon escaping into the wild.

The company argued that escape is unlikely, saying the fish are monitored 24 hours a day and contained in tanks with screens, grates, netting, pumps and chemical disinfection to prevent escape. The company's salmon are also female and sterile, preventing them from mating.

"Our fish are actually designed to thrive in the land-based environment. That's part of what makes them unique," Wulf said. "And we're proud of the fact that genetically engineered allows us to bring more of a healthy nutritious product to market in a safe, secure and sustainable way."

Casey Smith is a corps member for the Associated Press/Report for America Statehouse News Initiative. [Report for America](#) is a nonprofit national service program that places journalists in local newsrooms to report on undercovered issues.

Auburn Hills Kids Derby

This year's 17th Annual Auburn Hills Fishing Derby was on Saturday on June 12th, at Riverside Park. This year's event had 75 young anglers test their fishing skills to catch one or more of the 875 rainbow trout released in the Clinton River.

Even though fewer fish were caught this year, everyone who attended was excited to enjoy the great outdoors with family and friends. Those new to fishing were more at ease seeing volunteers from Trout Unlimited and Detroit Area Steelheaders on hand to assist participants with their fishing gear and help unhook fish.

Each derby session rounded out with every kid walking away with a raffle prize that included tackle boxes, fishing nets, hats, and over 60 slightly used rods and reel combos donated by Bass Pro Shops Outdoor World.

St. Clair AOTY Outing

Saturday June 12th, 2021 found the Detroit Steelheaders in St. Clair Michigan for the annual A.O.T.Y. Walleye outing. We were blessed with a beautiful day with temperatures warming to the mid 80's with a light southeast breeze. Conditions were great for a day of dragging crawlers,

vertical jigging, or wire lining on the St. Clair river. We had 15 boats sign up with a total of 35 anglers. The fishing was pretty good overall with some boats doing really well and others struggling on a slow bite.

We started the morning fishing south, below the power plant down to Marine City. We had a few fish early and then they shut off. We picked up a couple more and around 9:15 we decided to run back up north of St. Clair and see if we could get on some fish we worked the day before when we had Ed's son and two of his buddies out. On our first drift we never had a bite. We adjusted our drift and worked from above buoy 54 down to almost St. Clair. We started getting 2 or 3 fish on each drift. We weren't getting really big fish but at least we were getting numbers, and numbers meant points! With about 10 minutes left we decided to make one more short drift and the fish really started biting. We landed 7 fish in less than five minutes. We ended up keeping one fish less than a limit and we released a few smaller ones. But we all managed to catch our 5 fish needed for the weigh in!

We all gathered for the picnic and weigh in at the St. Clair boat Harbor. I'd like to say "THANKS" to Dave (the harbormaster) and his crew, for offering the pavilion and facilities for our event. I believe everyone enjoyed our lunch and had a great time!

We hope you all had a great time and look forward to seeing you again at the next outing!

Tight Lines,

Rob Pinskey & Ed Paehlig

Manistee Results

Eight boats made the trip to Manistee on June 5th in hopes of hooking up with some mature Kings. Unfortunately, high winds and rough seas delayed the tournament until Sunday. Port Captain Fred 'Lake Buzzard' Chartier hosted a great

lunch Saturday afternoon at the pavilion near the 5th Street Beach area. Conditions improved on Sunday, and seven boats fished an abbreviated fishing period. Big fish proved elusive, but Bob Feisel managed to bring an 18 pound King to the scales for the \$70 big fish prize money. Jim Zanke on Hard Top & Tails won \$35 for largest Lake Trout. Skipper Joe Delisi on the Wonder won the tournament, with his four fish 43 pound box. Joe also won \$35 for a big 11.75 pound Steelhead. All seven boats that stayed for the Sunday tournament caught fish. A total of 19 fish were scored.

Harbor Beach Results

We had seven boats participate in the Harbor Beach SOTY tournament. Conditions were ideal as the crews caught a mix of Coho

Salmon and Lake Trout. Skipper Bob Feisel finished with the win, and \$35 prize for largest Lake Trout.

Blaise Pewinski and the Sea Hag crew finished second with a nice creel of trout. Joe Delisi on Wonder had strong third place finish with a mixed catch that included the largest trout and salmon that was good for \$105. Six of the seven boats weighed fish. Thank you to port captain Joe Von Grabe for hosting the event and a great shore lunch.
