

NEC CODE UPDATE

PRESENTATION

Sponsored by: **Independent Alliance of the Electrical Industry, William Penn Division.**

ATTENTION ALL ELECTRICAL CONTRACTORS, INSPECTORS, ENGINEERS, ARCHITECTS, ELECTRICIANS AND ELECTRICAL PROFESSIONALS

This year, the Pennsylvania Uniform Construction Code (PA UCC) is preparing to adopt the new code editions. That's right, over the next few months, the electrical codes are on track to change from the 2018 editions to the 2021 editions of the adopted International Code Council Codes. With this change, the National Electrical Code, as referenced in the International Building Code, will be changing from the 2017 to the 2020 edition.

This presentation will include highlights of the changes and include PA amendments to the electrical sections of the International Residential Code promulgated by the Department of Labor & Industry for single, two-family dwellings and townhouses (i.e. residential).

Our presenter will be Marc Faulkner the owner/manager of Faulkner Inspection Services which is certified by the Pennsylvania Department of Labor & Industry as a third-party agency.

Coffee and Donuts as well as lunch provided

=====
