

PT Market Update – December 2025

This monthly report provides a summary of publicly disclosed M&A activity in the PT market from a practice owner's perspective. Only transactions announced via press release or where PTPS&C has been provided with permission are included.

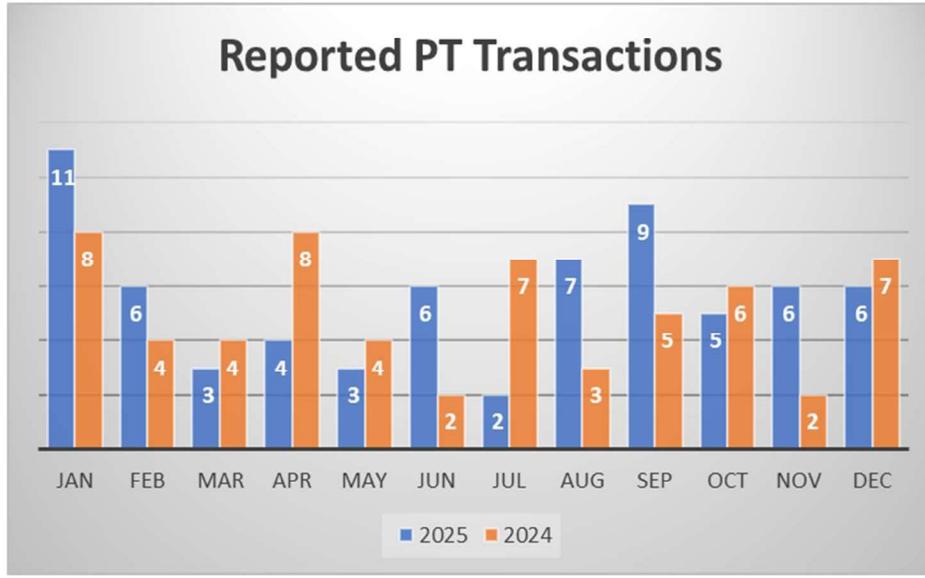

In December 2025, there were five reported closings, compared to seven in December 2024. For the full year, 68 transactions closed in 2025, up 13% from 60 in 2024. The average number of clinics per transaction was 20.4, influenced by several large deals. Transactions involving seven or more locations accounted for 18% of the total, while those with three or fewer locations made up 68%, similar to last year's distribution.

The market remained robust in 2025, with new buyers entering and economic conditions improving. Based on current trends and buyer engagement, the projected transaction volume for 2026 is 60–70, supported by recent interest rate reductions and sustained demand. However, market performance will depend on broader economic conditions.

This report currently reaches over 3,000 readers each month. We are grateful for your continued support. If you would like to receive this report via email or wish to share your feedback, please contact us with the subject line "SIGN UP" at mike@physicaltherapybrokers.com.
