550 S. Lafayette Street, Sioux City, Iowa

PROJECT UPDATE

If you have been by the Siouxland Expo Center lately you will probably notice the walls are starting to go up and the roof is being installed! It has been so enjoyable to see the progress which is now very evident day by day. The weather recently has assisted with some very productive days.

The walls and roof will continue to be the top priority for now. Once the building is enclosed, the work will shift to the inside of the building. The parking areas directly adjacent to the building and landscaping work will start in the spring. The project is projected to be complete in July.

Stay tuned for more updates!

Dirk Lohry,
Siouxland Expo Center President
