

Bunker Solution Bunker Lining System - Proprietary Stand-Out Points

- **A Fifteen Year Product Warranty!!!**
The Liner will literally outlast the USGA's life expectancy of a bunker!
- You **can** hit a golf ball right off of the liner! No worries of golf club head damage or wrist injuries!
- **No** gravel or rock in the bunker from day one!
- The use of string weed trimmers for edging **do not** damage the liner!
- The Bunker Solution liner holds sand on the faces extremely well! Reduction in sand on the faces help eliminate plugged balls!
- Nothing to breakdown, chip off, break off or deteriorate over the course of the life of the bunker liner.
- **No** perched water table issues, regardless of the amount of sand maintained over the liner!
- The water field capacity for drainage is realized in the drainage trenches, **not** the bunker floor!
- **No** ricochet effect from a golf ball hitting high in the bunker face, even with minimal sand on the faces!
- Consistent moisture content throughout the bunker floor!
- The Bunker Solution bunker lining system keeps the bunker sand much cleaner than the "hardscape type" liners.
- **No** heaving or movement once the sand is worked into the liner!
- **Easy** to check bunker drainage exits with no gravel in the drain lines! No contamination worries!
- **No** installation delays waiting on multiple bunkers to be completed! Installation of the Bunker Solution lining system can begin with the completion of each individual bunker!
- **Made in the USA!**
- **No** production or delivery delays!
- Bunker Solution is also superior in adaptability of installation options per design or regional influence.
- One Manufacturer, so the product is exactly the same regardless of where Bunker Solution is installed!
