

Olf's Texas Snake Obedience Training

Olf ll vom Soennerbach completed his Texas snake obedience training today, and we couldn't be more proud of him!

The snake trainer immediately recognized that Olf ll is an exceptionally intelligent dog. He needed only one correction to understand that he was to stay away from the snakes. The moment the trainer introduced the snakes, Olfl immediately moved behind the trainer and showed absolutely no further interest in them. This response confirmed his excellent obedience and ability to make good decisions when faced with a potential danger.

After we submitted Olf ll's training documents and results to his breeder and trainer, they confirmed that a good character and stable temperament are the foundation of their breeding program—qualities that Olfl has once again demonstrated and proven himself to possess.

We are incredibly proud of this boy and the wonderful character he continues to show.
