

Road Safety Assessment Consultant in India

SLS TTIC PVT LTD provides comprehensive Road Safety Assessment services aimed at identifying risks, improving infrastructure safety, and reducing road-related accidents. With an experienced team of traffic engineers and safety specialists, we help urban planners, government agencies, and private developers create safer roads for all users.

Our Road Safety Assessment Services

- **Road Safety Audits (RSA)**
Independent and systematic evaluations of road design both exist and propose to identify potential safety issues.
- **Black Spot Identification & Analysis**
Detailed study of accident-prone locations and development of targeted measures to reduce crash frequency and severity.

- **Crash Data Analysis**
In-depth analysis of historical accident data to identify trends, contributing factors, and required interventions.
- **Pedestrian & Vulnerable Road User Safety Studies**
Assessments focused on improving safety for pedestrians, cyclists, school zones, and other vulnerable groups.
- **Safety Improvement Recommendations**
Practical, cost-effective engineering interventions such as signage improvements, geometric modifications, lane adjustments, and traffic calming measures.
- **Speed Management Studies**
Evaluation of speed patterns and recommendations for safe speed limits and enforcement strategies.
- **Work Zone Safety Planning**
Ensuring safe traffic movement during construction, maintenance, or development activities.

Benefits of a Road Safety Assessment

- Reduces accidents and enhances public safety
- Supports safer mobility for all road users
- Helps authorities and developers plan better transport infrastructure
- Provides clear, data-driven recommendations

Road Safety Assessment Consultant in India

- Ensures compliance with national and international road safety guidelines
