Celebrating 25 Years of Excellence in Traffic and Transportation Consultancy

FLAGSHIP PROJECTS OF SLS TTIC

Bangalore Central Area Traffic Management Plan (BCATMP)

SLS TTIC pioneered the "Bangalore Central Area Traffic Management Plan," aiming to alleviate congestion, reduce delays, cut down pollution, and enhance travel efficiency in the heart of the city. The Plan, conceptualised in the year 2000, included scientific analysis of the current scenario using software TRANSYT, and measures to reduce conflicting movements at 106 intersections by making most of the links one-ways.

The plan covered about 106 intersections spread across the central area of the city composing of 5 sectors: Minerva Circle and adjoining area, Hudson Circle and adjoining area, Anand Rao and adjoining area, Sankey Road and adjoining area, M.G.Road and adjoining area. The Plan was implemented in the year 2002 and Cunningham Road, Millers Road, Nrupathunga Road, Raj Bhavan Road, Chowdaiah Road and Infantry Road are some of the major roads which were made one-ways.

The evaluation of the implemented measures showed that there was reduction in delays at all the strategic links to the tune of almost 30% and resulted in huge benefits to the economy of the city.
