LABORATORY USE ONLY

Updated 2/2024

BACTERIOLOGICAL SAMPLING PROCEDURES

Locate a faucet inside of a house, preferably. An outside faucet may be used, but is more difficult to clean. Find a faucet with separate controls for hot and cold and has an aerator or screen that is easily removed and remove it. Run a little bit of cold water to clear the faucet. Clean the end of faucet with a flame, bleach, or rubbing alcohol. Run cold water again for at least 1 min. Remove the plastic seal on the cap and discard. Carefully open the bottle without touching the inside of the bottle or cap. Reduce flow to pencil-thin stream. Fill the bottle to the top. Do not overflow.

Fill out form with name, address, phone #, date collected, time collected & sample location/faucet. Sample must be delivered to the lab within 30 hours. NOTE: Samples must be kept cold or on ice until delivered to LabTest.

COLIFORM BACTERIA Total Coliform bacteria is a group of bacteria used by the EPA and State of Washington as an indicator of possible contamination in water. If your water tests negative for Coliform bacteria, then it is usually considered drinkable. If you have Coliform bacteria present in your water, the water is not safe to drink, but is usually okay to bathe. If you have *E. coli* in your water, you cannot drink or bathe in the water. **WELL SANITATION** With Coliform bacteria present and especially with *E. coli* present, you should clean the water system. We can clean your water system for our standard charge, or you can try to clean it yourself using shock-chlorination procedures.

Please call **LabTest** -(509) 575-3999 with any questions.

Drop-Off Locations by 10AM In Ellensburg-Kittitas County Health Department

Basic Package	\$100 (pH, Conductivity, Color, Turbidity, Iron, Nitrate, Hardness, Sodium) 1 bottle required - 50 mL Minimum
** Basic with Bacteria testing	\$125 2 bottles required- 1 sterile bacteria, 1 additional 50mL minimum
** Bacteria + Nitrate Pkg.	\$70 2 bottles required- 1 sterile bacteria, 1 additional 50mL minimum
** FHA/VA Package	\$125 (Lead, Nitrate, Nitrite, Arsenic, Bacteria Testing) 2 bottles required- 1 sterile bacteria, 1 additional 50mL minimum
** General Pkg	\$180 (pH, Conductivity, Nitrate, Chloride, Sulfate, Lead, Arsenic, Iron, Hardness, Sodium and Bacteria Testing) 2 bottles required- 1 sterile bacteria, 1 additional 50mL minimum
Corrosion Package	\$240 for Taste/Odor/Discoloration/Buildup problems: (Alkalinity, Conductivity, TDS, pH, Cadmium, Calcium, Chromium, Copper, Lead, Nickel, Sodium, Zinc) 1 bottle required- 250mL minimum
** Heavy Metals	\$240 (Includes General Pkg plus Copper, Zinc, Chromium, Manganese, & Nickel) 2 bottles required- 1 sterile bacteria, 1 additional 250mL minimum
** Complete Package	\$295 (Bacteria, pH, Conductivity, Fluoride, Chloride, Nitrite, Nitrate, Sulfate, Color, Turbidity, TDS, Hardness, Lead, Copper, Iron, Arsenic, Sodium, Calcium, Magnesium, Chromium, Manganese, Zinc, Nickel) 2 bottles required- 1 sterile bacteria, 1 additional 250mL minimum

****Please include specified minimum mL bottle in addition to the bacteria bottle if testing water for any **marked packages to provide sufficient sample volume for testing.**
