

GET MORE FROM YOUR NDT RESONANCE INSPECTION SYSTEM

UPGRADE **NOW** AND SAVE OVER **50%** ON NEW HARDWARE AND SOFTWARE!

Invest in innovation at a discount by upgrading your system to the NEW state-of-the-art NDT-RAM software and hardware.

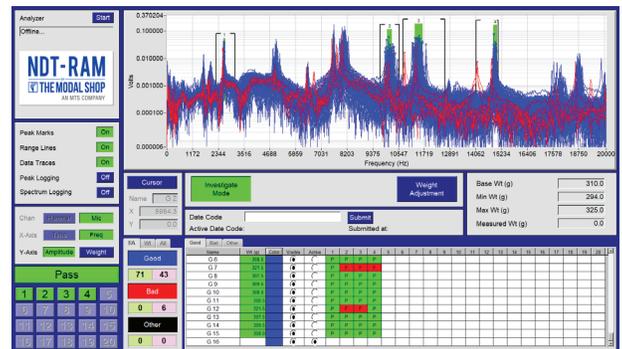

WHY UPGRADE?

- **Faster testing speeds** (as fast as 0.5 s per part) for increased part throughput ^[1]
- **Streamlined user interface** simplifies operator training and system use
- **Expanded frequency range (up to 94 kHz)** for detection of higher frequency resonances associated with smaller defects
- **4X increased measurement resolution (to 128k)** improves defect detection capability
- **Integrated process compensation** makes managing lot to lot and normal process variation simple
- **One touch part changeover** simplifies part changes
- **Database connectivity** simplifies test reports and part traceability

HOW IT WORKS

- Contact The Modal Shop for an upgrade proposal
- Trade in your current analyzer / microphone combination ^[2]
- Our team will upgrade the system and have your team trained in one day or less

WHAT YOU GET

- New analyzer options: 94 kHz or 20 kHz max bandwidth
- New microphone with expanded frequency range
- Free software license seat upgrade to version 11 ^[2]
- Installation and training included ^[3]

WHY NDT-RAM FROM THE MODAL SHOP?

- Keep peace of mind and confidence in your quality system with increased functionality and detection capabilities
- The Modal Shop is the market leader in resonance inspection with 20+ years of industry and application experience and is here for you with our commitment to Total Customer Satisfaction, service, and support
