Syber-Vision
(How we differentiate from
the rest)

Syber-Vision Capabilities

Video Security

> Use motion or audio sensing to trigger recording, or record continuously or periodically.

> Overlay the current date/time as well as a logo or other information.

> Optionally record audio.

> Use a timer to determine when the system is armed.

> Images may be captured as either JPEG images, MPEG movies or Windows Media movies.

> Receive alerts via loudspeaker, email, instant message, voice phone call (with automatic redial), or external program/script.

Syber-Vision (UI3)
