Syberdog
Security Surveillance Solutions

Syberdog's Exclusive hardware Power Rack +

Why Syberdog

Syberdog is an innovator of Security Surveillance services and Machine Learning AI solutions.

Syberdog Leadership team built this company on the idea of providing the best value and engineering the latest technology in the industry.

Syberdog team members have been developing and installing Network solutions in the industry since 1991.

Syberdog's core management team has been providing Wireless and Wired Network, Equipment installation Solutions, and Support for over 30 years.

The Team

At Syberdog we push the boundaries of Physical Security Technology to create commercial grade performance solutions. Our people are redefining connectivity, solving today's Video security challenges and driving innovation in video automation.

- Our core management team has delivered Network and Installation Solutions for over 30 years.

- Past clients include AT&T, Frontier Communications, Verizon, BellSouth Telecommunications and more...

Focused on Intelligent Security Solutions!

Syberdog's core management team sold a successful 12-year-old Communications company in 2021. Giving us the opportunity to go back to our installation heritage and start Syberdog.

Focusing exclusively on Security Surveillance specializing in AI Machine Learning

➤ In 2010 the Security Surveillance business was a $10.1 Billion Dollar Industry, In 2021 it jumped to $28.02 Billion Dollars, and Projected to reach $45.5 Billion Dollars in 2027.

➤ Clients find our solutions resolve certain business problems. IE: counting objects, tracking vehicles, monitoring inventory.

➤ The teams many years in IP Network installation with our vast knowledge in the industry allows us to engineer unique solutions for clients. Implementing the security and AI vision at a faster and more reasonable cost structure!

- Syberdog's exclusively designed SUNCAM Power Rack Product Line features a Solar Powered 802.11 Wireless camera platform allowing video surveillance in places not accessible before at a FRACTION of the cost of our competition!

- Syber-Vision
  Custom Machine Learning Models and Scripting to support unique business needs such as license plate recognition, OCR, unique item tracking and enhanced productivity using existing video security assets.

- Security Surveillance Installation-
  Our Professional Installation Crews can do it all, both Wired and Wireless as well as Analog conversion to IP to save you time and money. From Data Racks to NVR's to the latest Security Cameras let us come in and show you !

- Network & Solution Design-Creating world class physical security network designs… and then installing them. We think outside the box.

Syberdog Competitive Product Line

(How we differentiate from the rest)

The benefits of the Syberdog SUNCAM and PowerRack Product Line!

Construction

No power. No data lines. This solution demonstrates how to effectively and affordably enable onsite temporary video survellance and theft prevention

Auto Lots

Similar to construction. How to get data and power lines out to the furthest reaches of your lot ?

Let Syberdog install the latest SUNCAM Product for you!

Natural Gas Storage Yards

No easily surveilled. SunCam supplies self powered, self contained multi camera video pods that communicate with long range RF or Cellular 4G data connections

Buildings

Commerical Building store a lot of expensive inventory and equipment. With people and transportation constantly flowing in and out of the property, it's a constant hub of activity.

Warehouse

Multiple entrances. Trucks going all times of the day and night. Damaged pallets. Forklift hits. Surveillance is a must.

Custom ML Vision projects

Have a use case that required notification when a unique or special object is identified?

Custom Machine Learning with Vision technology can make those automations take life.

After service support

On-site Support	Near-site Support	Break / Fix Support
• Locally based engineer • 6 hour Response time • No T&E billing • 800 number hotline • Dedicated support Engineer	• Adjacent based engineer • 24 hour Response time • T&E billing • 800 number hotline • First available support Engineer	• Regional based engineer • 48 hour Response time • T&E billing • 800 number hotline • First available support Engineer
