

HERE'S A CHANCE TO MAKE YOUR MARK!

CONTEST

[Kauai Community Science Center](#) was established in 2019 with the objective that all of the content and activities would be student generated and student led. KCSC does not want to influence students as they choose their topics, but we do want all of the students to be aware of and thinking about taking care of our planet, everyday.

With that in mind every project will have a **CLIMATE CONNECT** associated with it. There will be a logo somewhere on the exhibit along with a brief description of how that exhibit is related to taking care of our planet.

There is an element of environmental stewardship in every project if you look for it. For example, if the exhibit topic is football helmets, the climate connect could be that football is often played on grass fields. That could be tied to the importance of soil conservation and planting grasses or other plants on bare soil to limit erosion.

So this is how you make your mark. If you produce the winning design, your logo will be part of every KCSC exhibit and other KCSC communications. It will be used A LOT and support the sentiment of awareness for the importance of taking care of our planet.

CLIMATE CONNECT LOGO CONTEST

HERE IS WHAT KCSC IS LOOKING FOR IN THE CLIMATE CONNECT LOGO.

- Include the KCSC logo colors 
- The words, *CLIMATE CONNECT* and *KCSC* or *Kauai Community Science Center*
