Care Instructions

1. Keep the solar panel on the solar light assembly inside the birdbath basin clear from debris.
2. Clean solar panel with a damp cloth, do not use any abrasive or chemical cleaners to clean the solar panel.

1

Operating Solar Light

NOTE: The rechargeable battery comes preinstalled inside the solar light assembly. The battery needs to be fully charged before the light will operate properly. The rechargeable battery requires at least 8-hours of full sun light to fully charge.

Place the assembled birdbath in full sun light, away from streetlight or other light sources which can cause the light to turn off.

Locate the pull tab under the basin. Remove the pull tab by pulling up on the exposed part of the tab.

Once the battery is fully charged, the LED light in the globe will automatically come on at dusk and turn off at dawn.

2

Thread the post (C) into the post connector (D) turning clockwise to tighten.

Thread the post connector (D) into the base (E) turning clockwise to tighten.

3

Thread the solar light assembly (A) onto the top of the post (C) turning clockwise to tighten.

Thread the basin (B) onto top of solar light assembly (A) threading the assembly clockwise to tighten.

4

Battery Replacement

Remove the basin (B) from the solar light assembly (A).

Turn the basin upside down to remove the battery (F).

Remove and replace the old battery with new one of the same rating. Reference the battery compartment for proper polarity direction.

Reference the "Operating Solar Light" to restore solar light to full operation.
