

## Mazda Release Bearing Info

On 2004-14 Mazda 3 with a 2.0L, 2004-09 Mazda 3 with a 2.3L non-turbo and 2006-10 Mazda 5 with a 2.3L, there are two different versions of the release bearing. The OE style bearing came with the clutch fork but the OE clutch fork is prone to failure. Mazda redesigned the clutch fork which requires a different style bearing. In order to use the new style bearing you must also replace the clutch fork with the new design and a new pivot pin/ball.
