## REACTIVE SUPPORT

We provide reactive support for subsea emergencies and loss of production including data gathering, fault finding and diagnostics, planning and preparation, execution, and reporting.

## PROACTIVE (LIFE OF FIELD SURVEILLANCE) SUPPORT

Our subsea surveillance support is provided to clients to avoid unplanned reactive interventions.

- Manage contracts, subsea strategy, IRM manuals, plans, budgets, critical spares, pigging strategies and chemical injection management.
- Interface management of vessels, 3rd parties and authorities.
- Plan annual DSV interventions and ROVSV inspection campaigns.
- Monitoring of IR, EPU, HPU, NAS Class, MCS, SSSVs and planning of PMRs.

## SUBSEA ENGINEERING

- Remote or local support
- Procedure writing
- Installation & construction
- Pre-commissioning & commissioning
- Technical representation

## INTEGRITY MANAGEMENT

- Fitness-For-Service assessments
- Fatigue analysis
- Materials and corrosion assessments

## PACKAGE MANAGEMENT

- Vendor and OEM management
- Package management of subsea equipment including cables, controls & umbilicals, valves and pipelines

## DECOMMISSIONING

- Late life extension
- Planning and execution
- Procedural engineering
- Recovery analysis
- Project management

## DISCIPLINES

- Project engineers
- Installation analysts
- Subsea equipment and package delivery engineers
- Field engineers
- Technical representatives
- Project managers
- Flow assurance
