WHERE TECHNOLOGY MEETS TRUST

company presentation

2023

Key Points

What's on the agenda?

- **ENGINES** – our Vision
- Problem
- Solutions
- Where we are in the solution
- Our Services

INGINES.PRO

WHERE TECHNOLOGY MEETS TRUST

Our VISION

Technology is one of the best
Enabler for any Business and
Organization.

We strive to help companies in
getting & setting it right!

INGINES.PRO

WHERE TECHNOLOGY MEETS TRUST

Problems

- Business and technology teams speak different languages
- Many applications for similar functions
- New projects are long and difficult

** The problems presented here are the top of the iceberg. An assessment may help you see where you are and how to get to the right place (if you are not there yet)*

Problems

- IT & Technology Budget is a challenge - vague understanding of the business value
- Attempts to simplify delivery, to improve delivery speed, cooperation, and team's commitments - are failing

** The problems presented here are the top of the iceberg. An assessment may help you see where you are and how to get to the right place (if you are not there yet)*

Solutions (1 / 3)

Align Business and IT, Governance and processes

To align, assessments of Business and IT processes must be done

Focus on IT:

- Assessment of IT Strategy – Business and IT strategy should be aligned;
- Assessment of IT support and maintenance policies;
- Assessment of IT processes related to Change Management and Project Management;
- Assessment of IT KPIs.

Solutions (2 / 3)

Align Business and IT, Governance and processes

To align, assessments of Business and IT processes must be done

Focus on Business:

- Project and Change Management processes, Roadmap process(es);
- Budget KPIs analysis;
- IT Governance;
- Company processes related to IT technology/systems.

Solutions (3 / 3)

Align Business and IT, Governance and processes

To align, assessments of Business and IT processes must be done

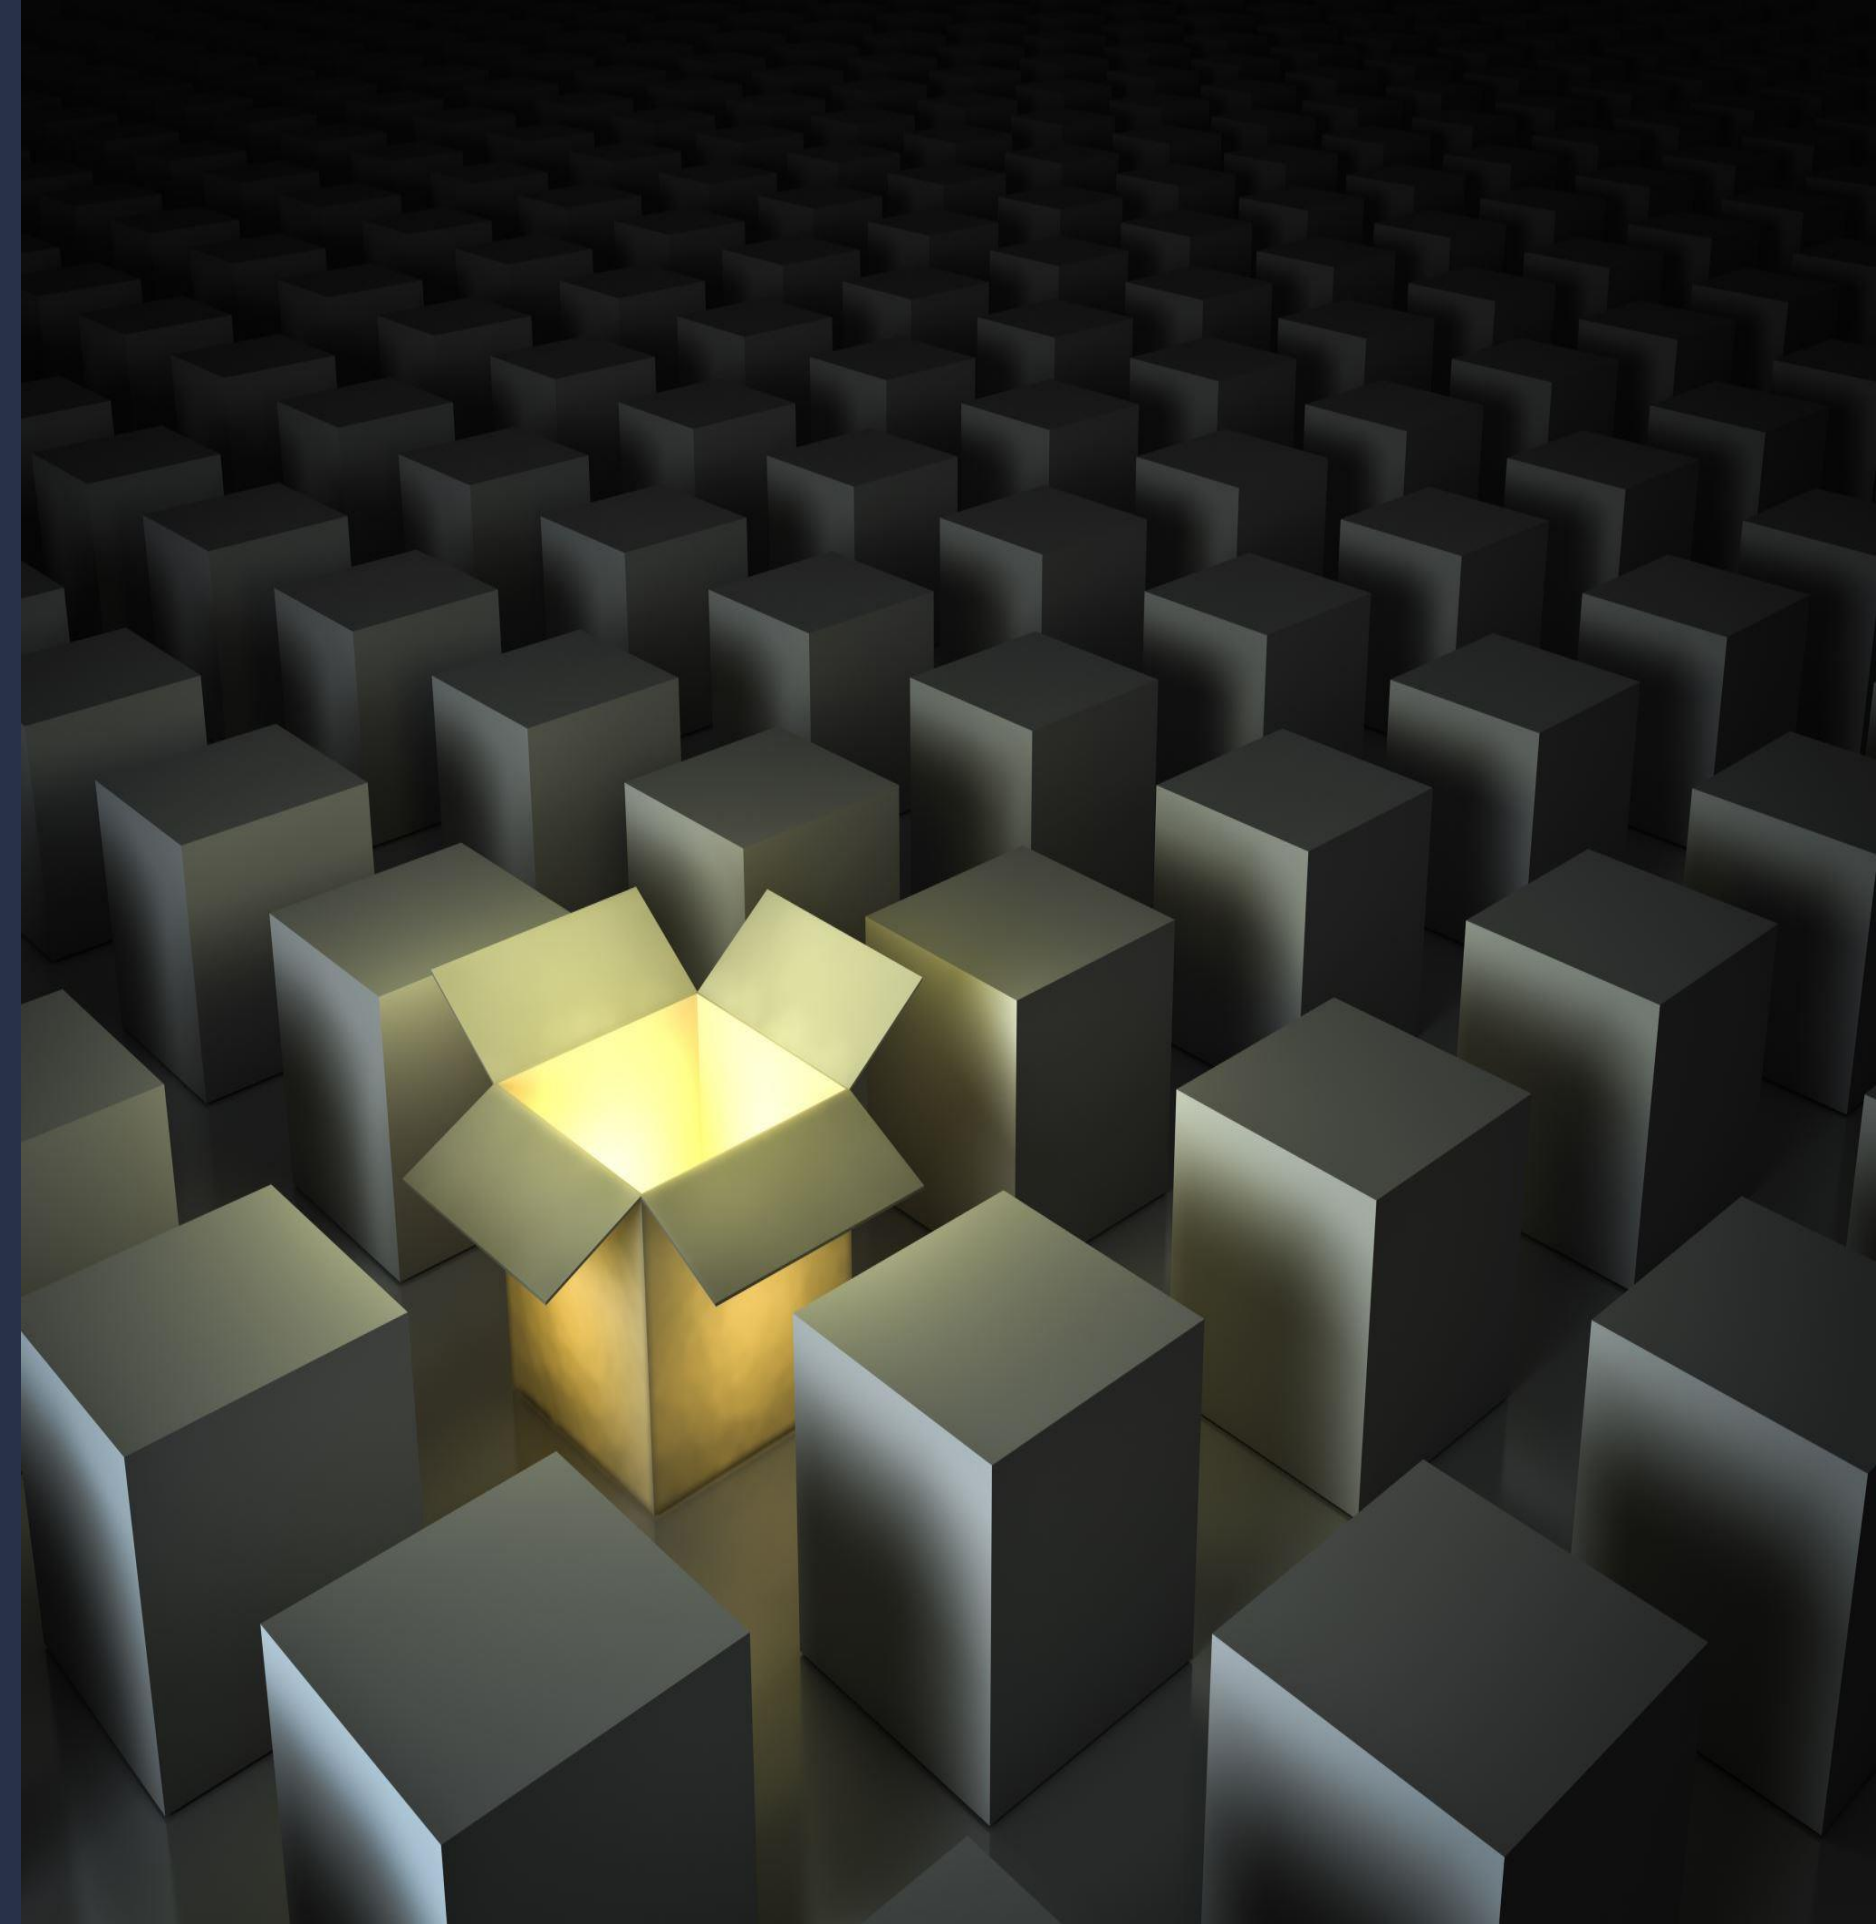

Result of assessment(s):

- Align Business and IT strategy;
- implement (modify & create) the processes / procedures;
- align Business and IT processes, improve Governance of IT;
- implement KPIs easier to follow and adjust when needed.
