5 BIOLOGICAL LAWS

1st Every disease and symptom from a conflict shock/SBS originates from a DHS it must meet the 3 criteria - is a serious, highly acute, dramatic and isolating conflict shock that occurs simultaneously on 3 levels: the Psyche, the Brain, and the Organ (this is one unit).

2nd At the moment of the DHS, the shock impacts in a predetermined area on the brain, the impact is visible as a target or concentric ring called Hamer Focus on a brain CT. The size of the Hamer Focus is determined. Every SBS runs in two phases as long as the conflict has been resolved. The resolution is incredibly important for the biological program to finish.

“If the patient has been made aware of all the facts, he will no longer need to get frightened by his symptoms. He can now fully accept these as the healing symptoms they are – all of which had until now caused fear and panic. In the greatest number of cases, the whole episode will pass without any serious consequences.”- Dr. Hamer

3rd This law connects the Senseful Biological Special Programs with the evolutionary development of the embryo. The three germ layers are: endoderm, mesoderm and ectoderm. These tissue layers are mediated via the brain from the impact of the Hamer Focus.

4th Microbes don't cause diseases instead the ontogenetic system of microbes play a beneficial role in the healing phase which correlate to the three embryonic germ layers.

5th Every “disease” is part of a Senseful Biological Special Program of Nature whose function is to assist humans and animals during unexpected distress. Nothing in Nature is meaningless, malignant or diseased.
