

Hair extensions

Here at Pixies, we have a variety of different extensions options to suit most hair types and budgets.

Hair extensions are a great investment, you can use them to add volume, length, or colour to your hair.

Your extension technician will do a full consultation with you to find out which installation method would suit your style & lifestyle best.

Consultation

Before you book your extension fitting appointment, you will need to book into the salon for an extension consultation.

This is a 10-30min appointment. Your technician will ask you questions to find out about your desired look. She/he will then help you decide which application suits your hair best. Your hair will then be matched up to the correct colour extensions.

Occasionally, your technician will apply one or two extensions to your hair so you can get an idea of how they will feel.

Once you are happy with your colour match and technique you can then book your appointment.

Pixies offer a finance solution on hair extensions so you can spread the cost. (terms and conditions apply). If you would like to use this option, please let us know at the consultation appointment.

Micro ring extensions

To install micro ring hair extensions, your technician will use tiny copper rings to combine strands of natural hair with the hair extension. Also known as micro bead or micro loop extensions, they are a really great choice when it comes to a longer-term hair extension solution. The hair extensions are applied one strand at a time with the rings holding the extensions in place securely. No glues or chemicals are required. Hair extensions using the micro ring technique, last for around 3 to 4 months before maintenance is required.

Why choose micro ring extensions?

- Micro ring extensions can be re-used again and again! When you are ready for your maintenance your stylist can remove your extensions and replace your copper rings and re apply the hair saving you money. You can also have a re-tight, your stylist will loosen your copper bead and slide them back up to your root area.
- Reduced risk of damage. As there are no adhesives or glues use in micro ring extensions, you are completely removing the damage caused when glued-in extensions are taken out of your hair.
- You do not need to leave your hair to "rest" after removal you can have your extensions put back in straight away.
- your hair remains bouncier and more natural due to attachment of individual strand attachment.
- You can treat your extensions like your own hair.

Tape Extensions

Tape-in human hair extensions are gentle on your natural hair, yet extremely secure. High-quality and long-lasting, tape hair extensions work very well as a semi-permanent hair extension option, great for those looking for an instant volume boost and hair lengthening solution, without the permanent commitment. Simple to apply and easy to remove. You can also have your extensions re-taped and re installed.

Tape Extension are applied using small wefts of human hair (these wefts are pre-taped with medical grade tape) a small section of your hair is sandwiched between two tape wefts. Your technician will determine how many tapes you should need for your desired look.

Why choose tape extensions?

- They are quick to apply (you can do it in your lunch break).
- They grow out with your hair.
- Can be removed after 6-8 weeks and can be re applied shortly after.
- They are lightweight and easily hidden.
