

MINERAL MICA

GET SET for new easy-to-use PVA and Mineral mica blends for resinous flooring systems

Take your resinous flooring from ordinary to extraordinary. Our proprietary blends include mica, a glimmering silicate mineral found as minute crystals in granite and other rock. And unlike our competitors in the market, our "Mineral" mica doesn't float in air...in fact, it broadcasts just like PVA. So easy to work with and without the extra mess!

Introducing our Pre-Blended Mineral Mica

- Clean & trouble-free broadcast
- Drastically cuts installation time!
- Allows for one-day installations
- Eliminates mica razor blades
- Permits fast chip reclamation before clear coating
- Minimizes clean up after installation
