ABOUT US

We at Medimore we try to make our client's lives easier, by making there ordering of consumables and sourcing of equipment easier

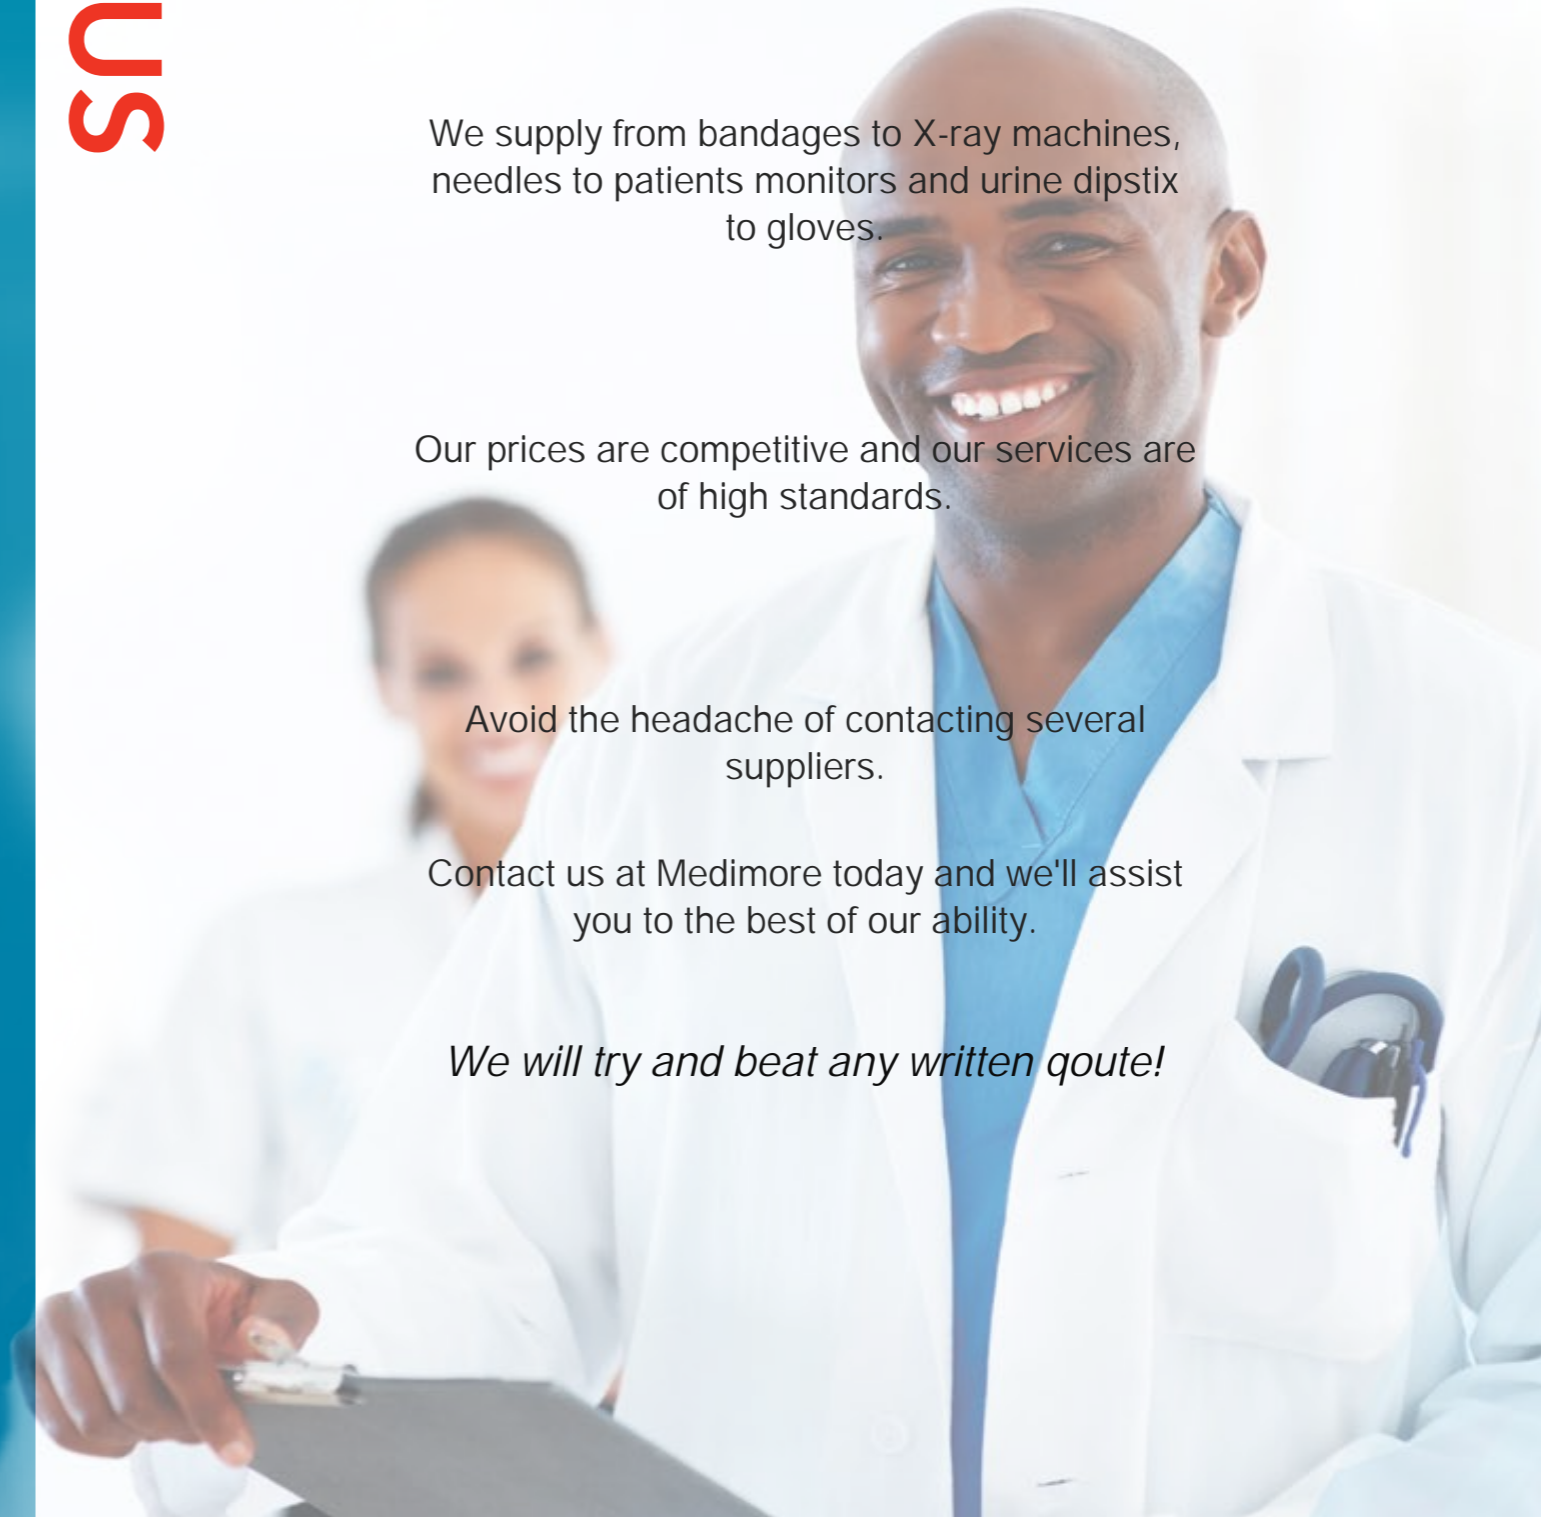

We supply from bandages to X-ray machines, needles to patients monitors and urine dipstix to gloves.

Our prices are competitive and our services are of high standards.

Avoid the headache of contacting several suppliers.

Contact us at Medimore today and we'll assist you to the best of our ability.

We will try and beat any written qoute!

Syringes 3 Part

Syringes are made from non-toxic medical grade polypropylene/ polyethylene designed for its compatibility with medication. Such high-grade material in conjunction with modern manufacturing techniques, provides for a robust syringe with excellent watertight properties. All Healthease 3 Part Syringes are latex and PVC free indicating that the additional black gasket found in 3 part syringes specifically is always guaranteed latex free. Healthease syringes assimilate the following features that conform to our standards for safety, convenience and user-friendliness, providing high quality for health care professionals.

0.5ml Insulin Syringe with 29g Fixed Needle

Healthease Hypodermic Needles

Healthease needles are ground on high precision machines designed to create superior sharpness, and therefore ensure injections with minimal pain.

Safe use of this product assumes prior training in its use. Used cannulae may be contaminated and should be disposed of in puncture-resistant containers. Do not re shield used needles, and obtain appropriate medical attention in case of sharp injury.

Healthease Diagnostics

Healthease diagnostics is a growing range of Neomedic. We currently offer a range of pregnancy tests that indicate a positive or negative result based on the presence of elevated levels of Human Chorionic Gonadotropin (HCG) in urine within a few minutes. Other diagnostic markers and tests are also available upon request including Malaria, HIV, Syphilis, Typhoid, and Hepatitis. Furthermore, we provide a vast range of blood grouping reagents on request.

Healthease IV Admin Solutions

Intravenous (IV) therapy plays a vital role in the care of patients; however today with modern techniques and advanced technology these are no longer just confined to hospital use alone. Our goal is to provide for safe infusion therapy from venous puncture to infusion for whatever purpose, be it for administration of fluids, medication, transfusion therapy, or nutritional support. As we continue to grow this range to include catheters, flow regulating devices, and other variations of administration sets, we will continue to keep the safety of health care professionals and patients in mind.

Healthease Patient Monitoring

At Neomedic we continue to develop and expand our range of patient monitoring devices. Today the Healthease range of patient monitoring devices cover a range from blood pressure measurement devices to fever management. Healthease patient monitoring devices aim to assist consumers and medical professionals to make the necessary changes required to avoid lifestyle related diseases and at the same time improve health in a variety of areas. Our goal is to assist people in using medical data to take responsibility for their well-being and further develop tools to enhance this process.

Healthease Air Management

At Neomedic, our Healthease Air Management range is dedicated to utilizing the latest technologies to enable medical professionals and patients alike in managing inhalation therapy to assist in the treatment of asthma and other respiratory conditions. Our range covers nebulizers that are an extremely efficient form of depositing medication with less coordination than that required by MDIs or dry powder inhalers resulting in uniformly deposited medication in the upper and lower respiratory tract for maximum effect. Our oxygen concentrators with the optional nebulizer function are effective devices that separate oxygen from air to provide supplemental breathing oxygen to individuals with chronic lung disease. Accessories such as nebulizers, oxygen cannulas and masks as well as an electronic aspirator supplement the range.

Nebu Mist Nebulizer

ORDERING INFORMATION

SIZE	PRODUCT CODE
One per box	NNM-01

Plasterman Range

The Heathese Plasterman range covers products that fall under the areas of orthopaedics, compression therapy, and wound care. As the lines within the range expand we continue to cater for all sectors, be it for medical professionals, young children, older adults or simple everyday products such as the little plaster that you need for a graze or a cut. All Plasterman products are born from the same ethos at the core of our company "commitment to quality". This commitment can be found in simple gauze rolls and compresses to the various bandages and tapes with specific purposes from wound care management to sporting needs.

PRODUCT INFORMATION

- EAB are well suited for dressing retention as well as conditions that require compression treatment and limitation of movement
- Ideal for ankle taping, knee taping, hand taping and wrist taping
- Provides reinforcement for strains, sprains, weak joints and allows firm and easy maintenance of directional tension
- Suitable for use in correction of false position and posture as well as compression for varicose veins
- Strong porous adhesive and stretch ability keeps the bandage firmly adhered throughout lengthy treatment and allows the bandage to conform to body contours and joints
- The distinctive centre line permits accurate overlap during application made from high quality extensible cotton cloth with soft fluffy edges that ensure no cuts or marking of the skin
- Each roll individually wrapped in a colour and barcoded pouch
- Available in 4.5m length upon request

20cm x 3m – 6 rolls per grip lock bag	NHPSOP-20X3

PRODUCT INFORMATION

- 100% Polyester padding with a water-shedding ability that helps to keep skin dry due to low moisture absorbency and therefore minimizing skin maceration
- Soft and high loft with a high fleece density, providing superior cushioning and patient protection as well as reducing the risk of rubbing and cast sores
- Excellent conformability for easy application around awkward contours, minimizing patient trauma and ensuring a smoother finished cast
- Easy to tear helping conformability and easy application, reducing the risk of stressing a fracture when finishing any padding application.
- Paper wrapped and therefore convenient for autoclaving in case a procedure requires sterility
- Compatible with all casting materials, POP, synthetic, fibreglass and thermoplastics
