Notice for Backflow Testing

Periodic Test and Maintenance

Backflow Prevention Report is due 12/13/24

As required under California Administrative Code Title No. 17, it is time for your yearly backflow prevention assembly test. This test needs to be performed by a certified backflow prevention assembly tester with a valid certificate of competence issued by the American Water Works Association.

Upon completion of a satisfactory (passing) test of the backflow assembly, have your certified assembly tester fill out the enclosed form and send it to our office NO LATER than 12/13/24. If the test discloses that the assembly on your backflow is not operating satisfactorily (fails) the test, you will need to make the necessary repairs and have the assembly retested, and send in the corresponding passing backflow form.

We suggest scheduling your appointment soon, as appointments book up quickly, and you need to make sure there is time to get repairs completed if needed.

Additional information regarding backflow testing may be obtained on our website at: www.pkh2o.com. If you have any questions, please call our office at (707) 539-6397.

Sincerely,
Penngrove Kenwood Water Company
