

# FAST DECON CUT SHEET

## CATEGORY

Medical/Haz Mat

## PRODUCT APPLICATIONS

Decontamination

Patient Isolation

Triage

Field Support

## TIME TO DEPLOY:

60 Seconds

## SELF SUPPORTING RIGID FOLDING SHELTER WITH INTEGRATED FLOOR

**Only UniFold TM** can claim the fastest and easiest deployment in the industry. These shelters deploy in as little as 60 seconds and can be reused hundreds of times due to their once piece construction, with no free parts to lose or break. The ridged wall and floor make them suited to resisting extreme wind and rain, while easily accepting air conditioning or heating. Deploy them on any surface (grass, gravel, sand, asphalt or concrete), with no need for pegs or ropes.

Choose from a range of standard options, to meet your specific needs. From decontamination to positive or negative pressure for staff or patient isolation, UniFold easily adapts to the most challenging emergencies where seconds count!

**UNIFOLD**

The Fastest and Easiest Deployment,  
Period.

# PRODUCT CUSTOMIZATION

At UniFold, our mission is to provide the fastest and easiest deployment in the industry, for whatever application you may have. These self-supporting ridged structures are perfectly suited to customization for pandemic preparedness and response. Use them with positive pressure to protect staff from airborne contaminants, or isolate patients in negative pressure mode.

## KEY FEATURES

- Deploys in seconds on any surface with no assembly and no need for ropes, stakes, or inflation.
- All interior components including divider curtains, collection basins, plumbing kits and lighting are integrated to the shelter, and ready for use upon deployment.
- Twin wall polypropylene paneled structure, including insulated rigid floor.
- Exoskeleton structures are practically indestructible as folds can be reset if crushed
- Easily heated and air-conditioned
- Reusable hundreds of times.
- Minimal training due to totally integrated one piece design.
