The Problem

The Solution

Utility Function

*Yo' Bread, DeFi, and the
Ethereum Blockchain*

Unlimited Use Cases

*Laylor Corporation's
Timeline*

Team and Contact Us

Peer to Peer and Business to Business Cash Apps

- Lack of utilities.
- Unjustified account shutdowns.
- Long verification processes.
- Limited geographies.
- Delayed transfer periods.

Limited and Complicated

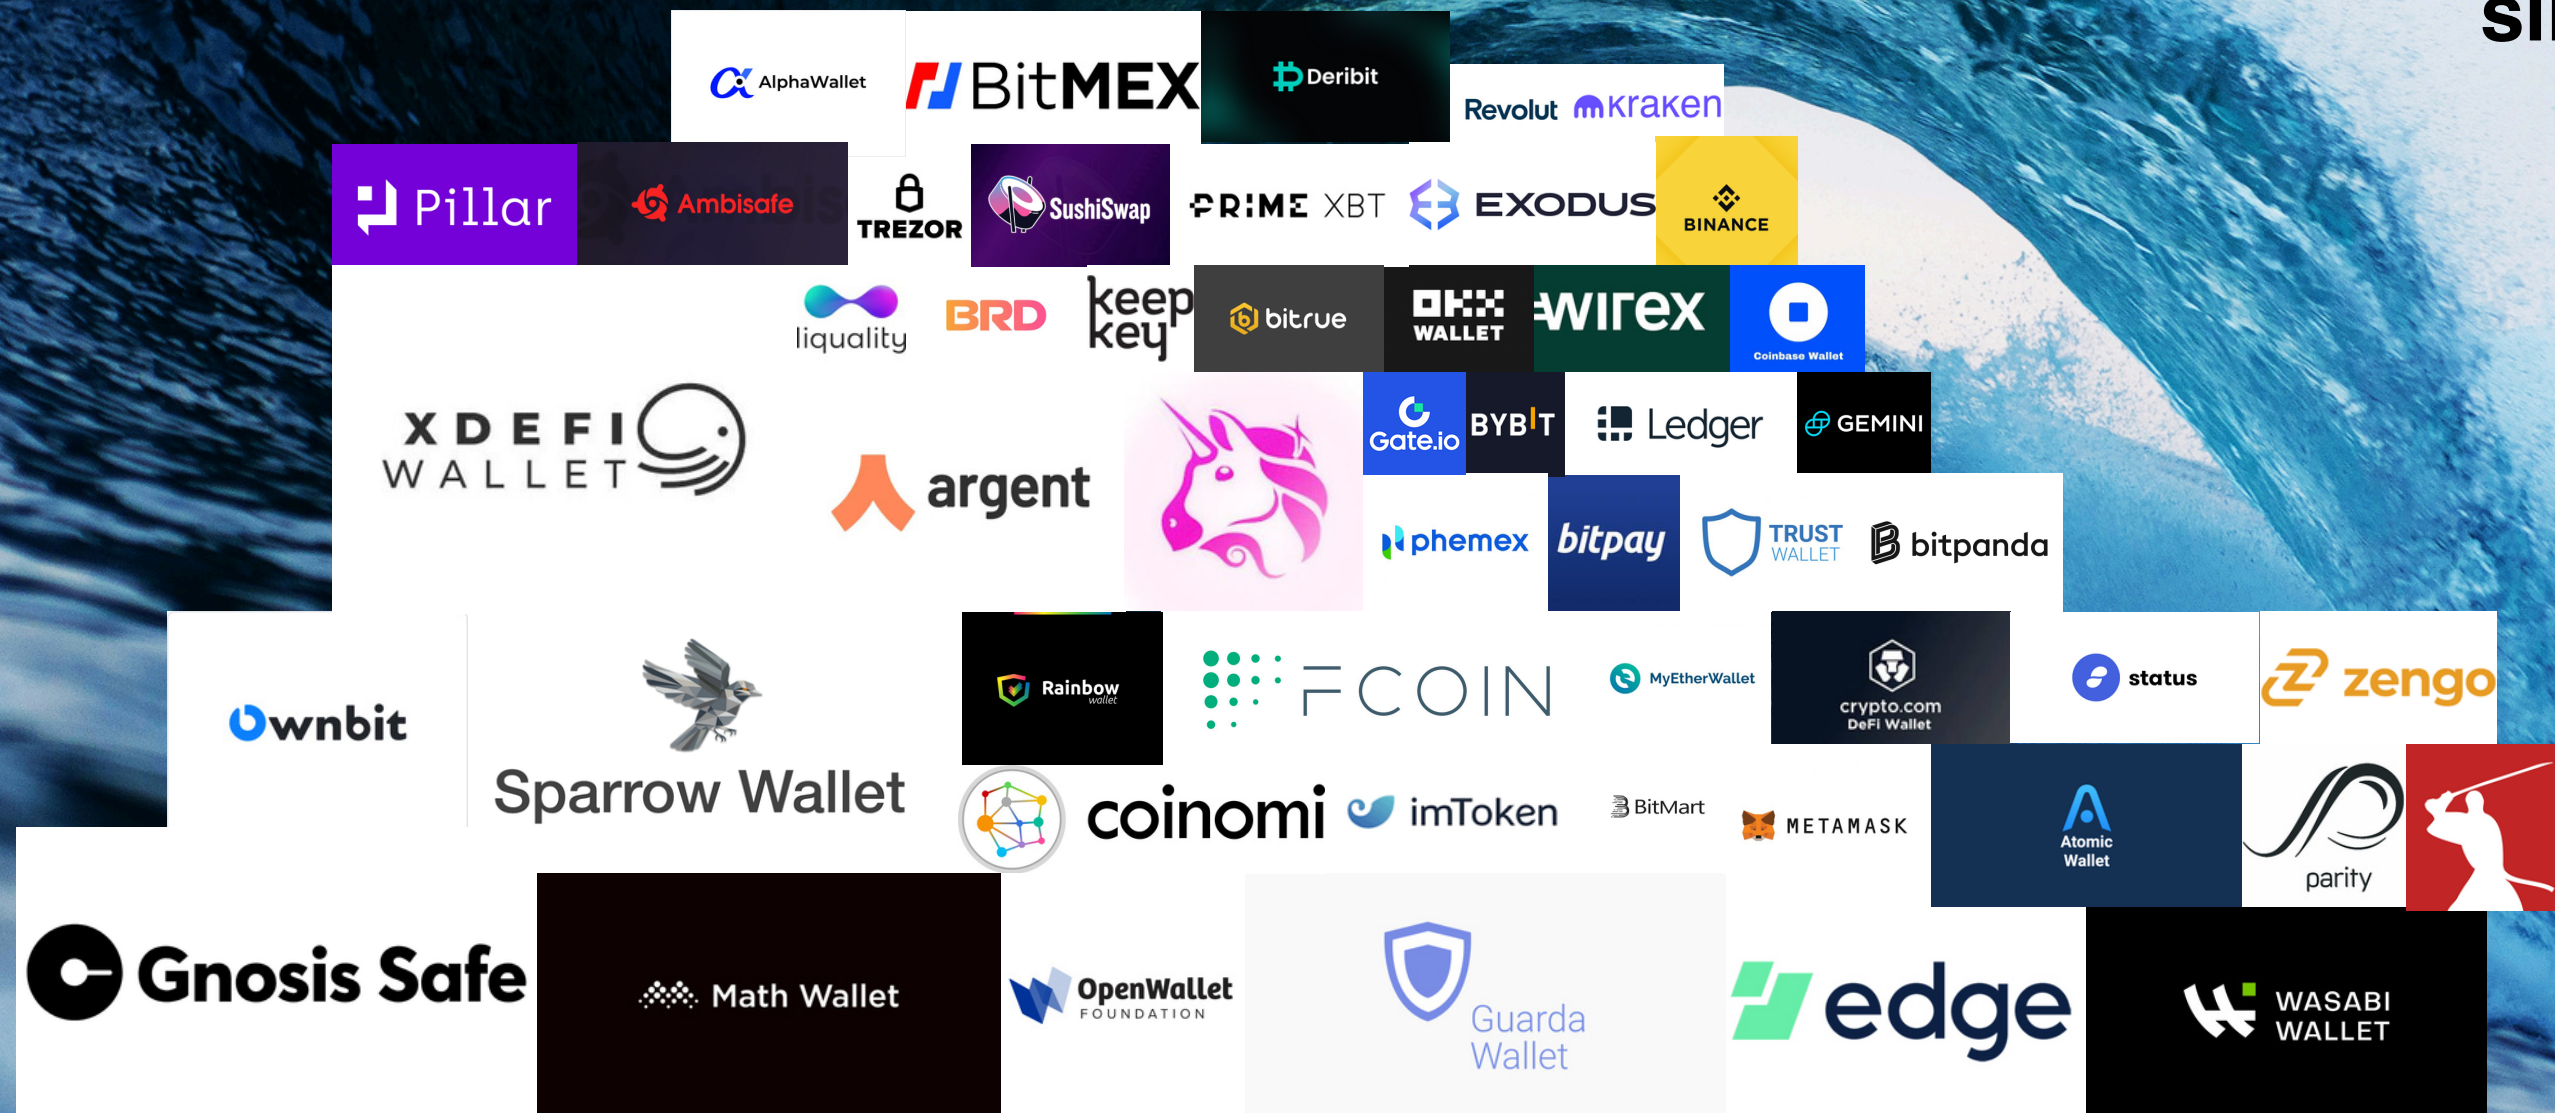

- Lack of capabilities.
- Difficult to understand.
- Unable to send cash fast.

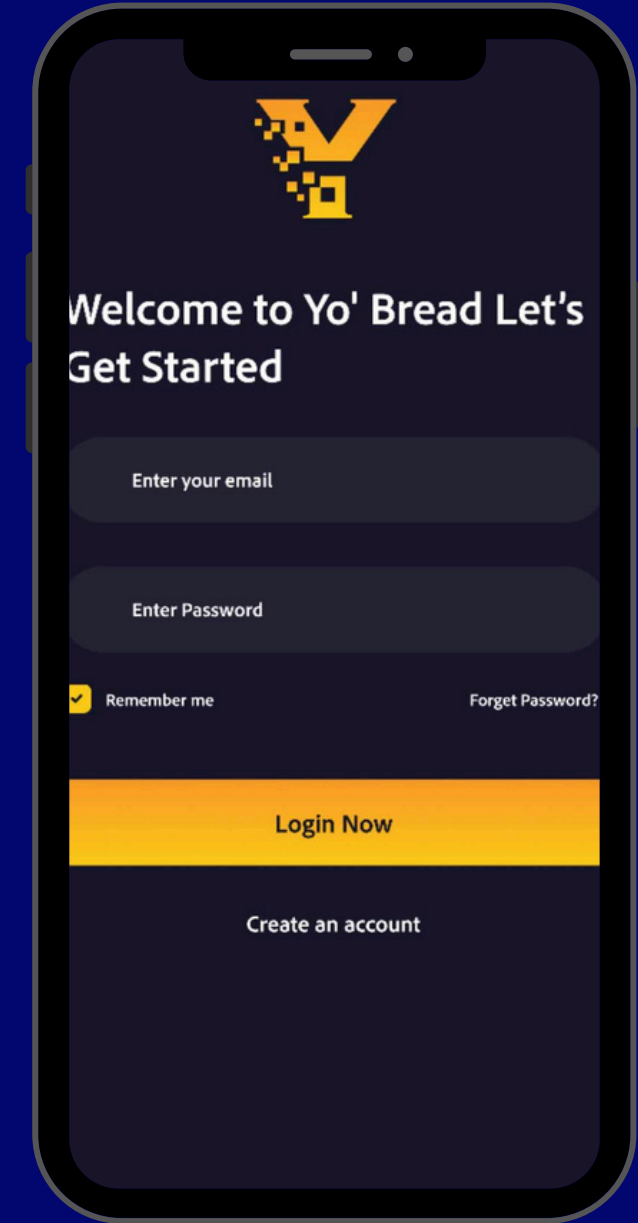

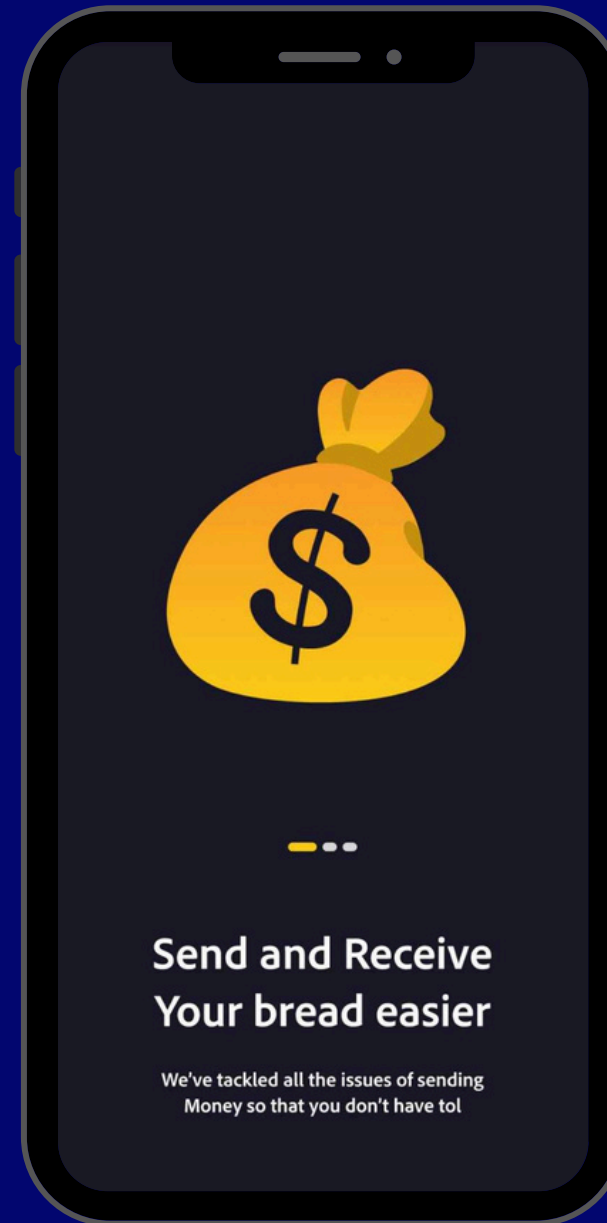

- Centralized crypto wallets infringe on their users' privacy and pose a high threat to users' assets.

- Decentralized crypto wallets lack simplicity and innovation.

- These wallets are just riding the wave.

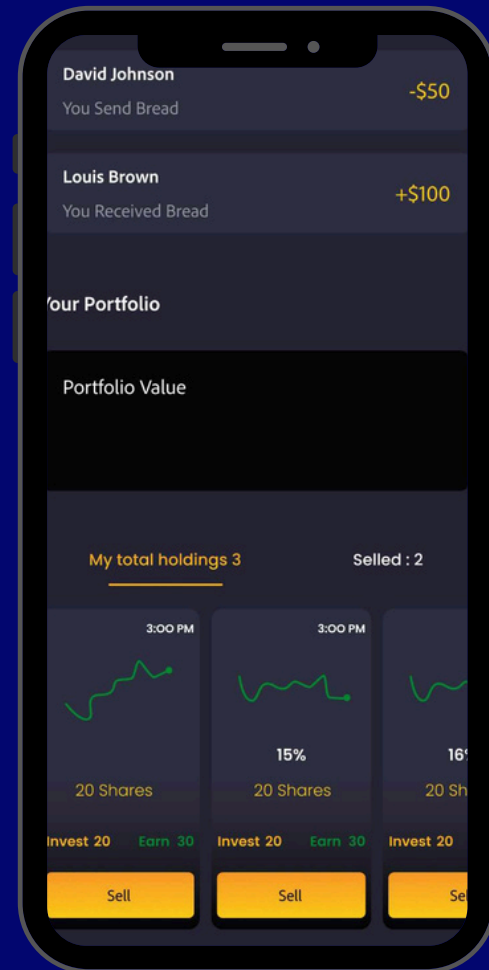

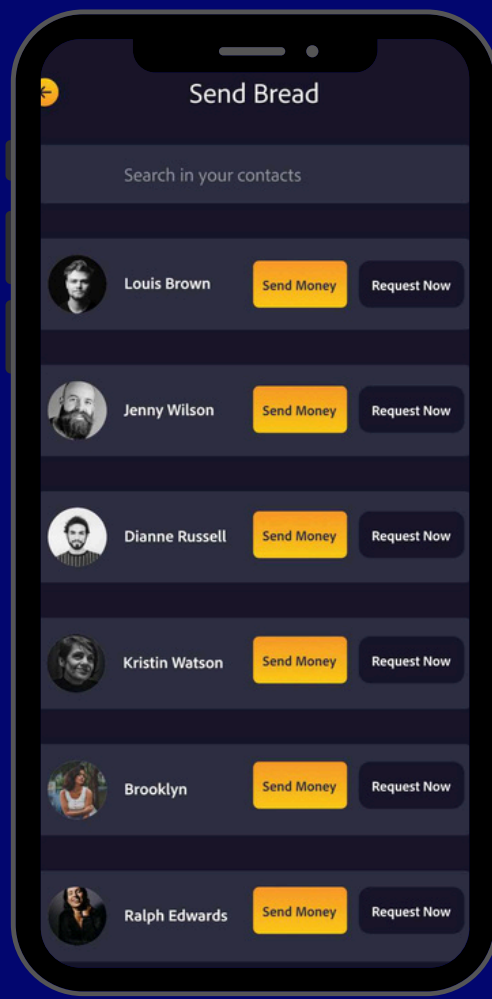

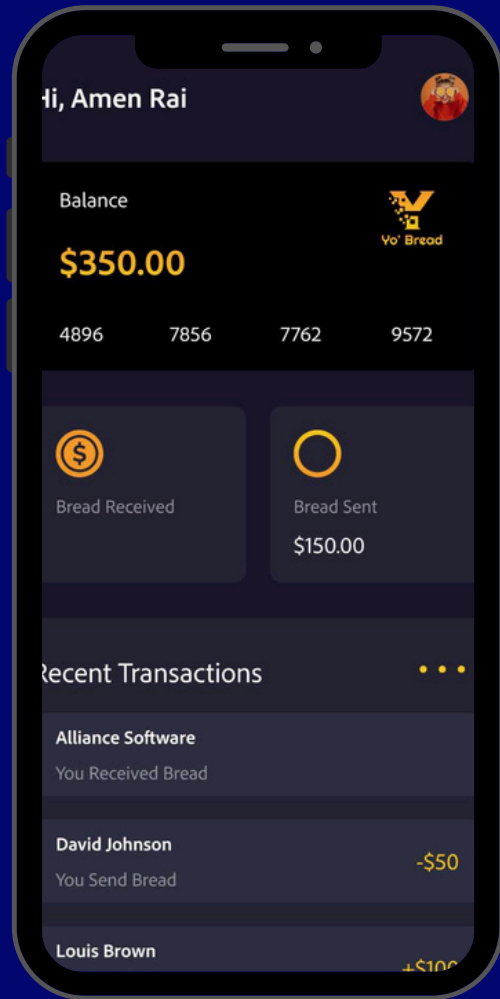

Yo' Bread

- A centralized and decentralized blockchain wallet hybrid.
- The first of it's kind.
- Revolutionizing international money transfers and investments.

Utility Fusion

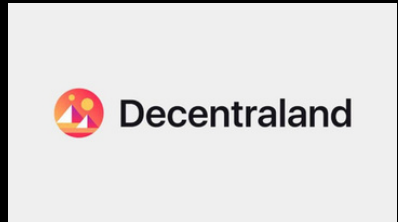

- International P2P and B2B money transfers.
- Send, receive, manage, and utilize your crypto.
- Invest in countless stocks and cryptocurrencies.
- Run your business and collect customer payments.
- Fully manage and oversee children accounts.
- Wallet integration with new technology and Web3.

DeFi (Decentralized Finance)

- Yo' Bread Digital Wallet will be operating on the Ethereum Blockchain.

- That gives our users unlimited access to brands, products, and services worldwide that accepts crypto as a form of payment like:
